About the Editor	ix
Contributors	xi
Preface	xv
PART I: FUNDAMENTALS AND INSTRUMENTS	1
1 Principles of Infrared Spectroscopy	3
<i>Éric Dufour</i>	
Introduction	3
History of the analytical development of infrared spectroscopy	5
Vibrational spectroscopy	8
Assignment of spectral bands in near- and mid-infrared regions	11
Conclusions.....	23
References	25
2 Data Pre-processing	29
<i>Åsmund Rinnan, Lars Nørgaard, Frans van den Berg, Jonas Thygesen, Rasmus Bro, and Søren Balling Engelsen</i>	
Introduction	29
Overview of pre-processing techniques.....	31
The multiplicative signal correction family	31
Standard normal variate and normalization	35
Baseline correction.....	36
Differentiation—Savitzky–Golay	38
Alternative methods	39
Example of reference-independent methods	40
Reference-dependent techniques.....	42
Case study.....	43
Conclusions.....	47
References	48
3 Multivariate Calibration for Quantitative Analysis	51
<i>Marcelo Blanco Romía and Manel Alcalà Bernàrdez</i>	
Introduction	51

	Multivariate calibration methods	52
	Advantages of multivariate calibration methods	53
	Stepwise multiple linear regression	55
	Calibration methods based on variable reduction	59
	Artificial neural networks	64
	Constructing multivariate calibration models	70
	Conclusions	79
	References	80
4	Multivariate Classification for Qualitative Analysis	83
	<i>Davide Ballabio and Roberto Todeschini</i>	
	Introduction	83
	Principles of classification	84
	Evaluation of classification performances	88
	Classification methods	94
	Conclusions	102
	References	103
5	Calibration Transfer Methods	105
	<i>Frans van den Berg and Åsmund Rinnan</i>	
	Introduction	105
	The transfer issue	106
	Data set and transfer set selection	106
	Calibration transfer case study	109
	Other calibration transfer methods from the literature	114
	Conclusions	116
	References	116
6	Infrared (IR) Spectroscopy—Near-Infrared Spectroscopy and Mid-Infrared Spectroscopy	119
	<i>Mengshi Lin, Barbara A Rasco, Anna G Cavinato, and Murad Al-Holy</i>	
	Introduction	119
	History of infrared instrumentation	120
	Optical systems in infrared instruments	122
	Sampling techniques of IR methods	135
	Infrared band and spectral interpretation	139
	Conclusions	141
	References	141
7	Fourier Transform Infrared (FTIR) Spectroscopy	145
	<i>Anand Subramanian and Luis Rodriguez-Saona</i>	
	Introduction	146
	A brief history of Fourier transform infrared spectroscopy	146
	The interferometer	148
	Fourier analysis	154
	Fourier transform infrared spectroscopy	156
	Fourier transform near-infrared spectroscopy	160
	Fourier transform mid-infrared spectroscopy	164
	Comparison of FT-NIR and FT-MIR	166
	Sampling techniques	167
	Factors affecting FTIR spectroscopy	172

Commercial FTIR instruments and accessories.....	173
Conclusions.....	173
References.....	174

PART II: APPLICATIONS..... 179

8 Meat and Meat Products.....	181
<i>Rahul Reddy Gangidi and Andrew Proctor</i>	
Introduction.....	181
Beef and beef products.....	183
Pork and pork products.....	193
Chicken and chicken products.....	197
Miscellaneous applications.....	203
Conclusions.....	206
References.....	206
9 Fish and Related Products.....	215
<i>Musleh Uddin and Emiko Okazaki</i>	
Introduction.....	215
Quantitative analysis.....	216
Qualitative analysis.....	228
Conclusions.....	236
References.....	237
10 Milk and Dairy Products.....	241
<i>CC Fagan, CP O'Donnell, L Rudzik, and E Wüst</i>	
Introduction.....	241
Milk production.....	242
Incoming product control.....	244
Process control.....	245
Milk powder production.....	248
Oil and fat production.....	251
Cheese production.....	252
Final product control.....	262
Good Laboratory Practice for IR calibrations.....	263
Networking.....	265
Future trends.....	266
Conclusions.....	267
Acknowledgments.....	267
References.....	268
11 Cereals and Cereal Products.....	275
<i>Birthe Møller Jespersen and Lars Munck</i>	
Introduction.....	275
Comparison of mid-infrared (MIR) and near-infrared (NIR) spectroscopy.....	276
Current practice in NIR spectroscopy for cereals and cereal products.....	278
Reproducibility of NIR spectra from multi-grain samples as influenced by genotype and environment.....	296

	Classification of NIR spectroscopy data by principal component analysis	299
	The NIR endosperm model as a tool to overview the phenome	304
	The unreasonable efficiency of infrared spectroscopy	306
	Future development	311
	Conclusions.....	313
	Acknowledgments.....	313
	References	313
12	Fruits and Vegetables	321
	<i>Hartwig Schulz and Malgorzata Baranska</i>	
	Introduction	321
	Fruits.....	321
	Vegetables	332
	Conclusions.....	345
	References	345
13	Fruit Juices	355
	<i>Yiqun Huang, Barbara A Rasco, and Anna G Cavinato</i>	
	Introduction	355
	Basic components of fruit juices	358
	Application of infrared technology to juice analyses.....	360
	Conclusions.....	371
	References	372
14	Wine and Beer	377
	<i>Daniel Cozzolino and Robert G Dambergs</i>	
	Introduction	377
	Wine	378
	Beer	386
	Conclusions.....	390
	References	390
15	Eggs and Egg Products	399
	<i>Romdhane Karoui, Bart De Ketelaere, Bart Kemps, Flip Bamelis, Kristof Mertens, and Josse De Baerdemaeker</i>	
	Introduction	399
	Egg composition.....	400
	Application of Vis/NIR in egg and egg products.....	402
	Conclusions.....	410
	References	410
	Index	415
