

CONTENTS

Section One-PROTEIN BIOCHEMISTRY

| | |
|-----------------------|---|
| Introductory Chapter. | 3 |
|-----------------------|---|

Section Two-LABORATORY TECHNIQUES FOR THE STUDY OF PROTEINS

| | |
|---|----|
| The Physico-Chemical Study of Proteins. | 27 |
| Osmotic Pressure. | 40 |
| The Light-Scattering Method. | 46 |
| The Ultracentrifuge. | 55 |
| Zone Electrophoresis. | 65 |
| Electron Microscopy. | 79 |

Section Three-NON-CONVENTIONAL FOOD PROTEINS

| | |
|--|-----|
| Non-conventional Protein Sources. | 87 |
| Technological Problems in Protein Utilization for Human Food. | 100 |
| Measurement of the Nutritive Value of Protein Supplements. | 104 |
| Indian Multipurpose Food. | 114 |
| Some Nutritional Problems in the Utilization of Non-conventional Protein for Human Feeding | 125 |

Section Four-FLAVOUR AND ODOUR

| | |
|---|-----|
| Recent Developments in Food Odour Research Methods. | 137 |
| Papers on Experimental Techniques and Results: | |
| Coffee. | 151 |
| Fruit Flavours. | 158 |
| Black Currants. | 165 |
| Potatoes. | 170 |
| Meats. | 180 |
| Milk and Cheese. | 185 |
| Fat-soluble Flavours. | 193 |

Section Five-WATER BINDING IN RELATION TO FOODS

| | |
|---|-----|
| The Nature of the Forces between Water and the Macromolecular Constituents of Food. | 207 |
| Hydration of Solid Proteins, with Special Reference to Haemoglobin. | 215 |
| The Water Imbibing Power of Foods. | 218 |
| Diffusion of Solutes at Low Moisture Levels. | 230 |
| Enzyme Activity at Low Water Contents. | 239 |
| Water Activity and the Growth of Microorganisms. | 248 |

Section Six-STRUCTURAL ELEMENTS OF VEGETABLE FOODS

| | |
|---|-----|
| Texture and Cell-wall Polysaccharides in Foods. | 259 |
| Hemicelluloses, Gums and Pectic Substances. | 282 |
| Cellulose and Glucans. | 291 |
| Lignin. | 300 |
| Technical Properties of Starch as a Function of its Structural Chemistry. | 310 |
| | |
| INDEX | 319 |
