

## CONTENTS

Contributors	xxvii
<b>PART I. THE FUNCIONS OF PACKAGING</b>	
1. The Role of Packaging in Preserving Foodstuffs	3
2. Information and Consumer Protection – the Role of Packaging	25
3. The Marketing Aspect of Packaging	33
4. Packaging and Microbiology	47
<b>PART II. RISKS ASSOCIATED WITH POTENTIAL FOOD CONTAMINATION CAUSED BY PACKAGING</b>	
5. Transfers between the Food Product and the packaging: Migration	59
6. Migration – the Risks of Organoleptic Changes in Foodstuffs	77
7. Toxicological Risks	87
<b>PART III. CONSUMER NORMS AND REGULATIONS</b>	
8. Packaging Regulations	103
9. The Agrofood Business – Legal Liability	113
10. Standardization of Packaging	129
11. The Consumer’s Point of View	141
<b>PART IV. THE CONTAINER AND ITS CLOSURE: PHYSICAL AND CHEMICAL PROPERTIES OF PACKAGING MATERIALS – RECENT DEVELOPMENTS</b>	
12. Physical and Chemical Reactions between metallic Packaging Materials and the Constituents of Foods – Corrosion and Protection	151
13. Glass Used for Packaging	183
14. Metallic Containers for Sterilization	203
15. Metal and Plastic Trays Suitable for Sterilization	221
16. Lightweight Metallic Packaging for Nonsterilized Foodstuffs	231
17. Stamped, Restamped and Stamped Drawn Cans	259
18. Plastic Films	269
19. Molded Plastic Containers for Foodstuff Packaging	282
20. Inks and Varnishes	297
21. Glues and Adhesives	309
22. Edible Films and Coatings	315
<b>Index for Volumes 1 and 2</b>	<b>355</b>

## **PART V. PACKAGING PROCEDURES FOR FINISHED FOODSTUFFS**

23. Automatic Packing Machines – Packaging	3
24. Aseptic Packaging	35
25. Continuous Aseptic Packaging of Liquid Foodstuffs Using a Complex Combination of Paper, Polyethylene, and Aluminum	51
26. Ionizing Treatment and Packaging – Preservation of Foodstuffs Packed in Flexible Packaging	65
27. Packaging Under Controlled Atmosphere	85
28. Technology of Bottling Beverages	105
29. Technology of Packaging Under Film	127
30. Cleaning and Disinfecting Reusable Packaging	143
31. Packaging for Transport	153
32. Palletization, Handling, Storage of Full Packs: Developing toward Robots and Flexible Packaging Workshops	173

## **PART VI. SOME SIGNIFICANT EXAMPLES OF SECTORS OF THE FOODSTUFFS INDUSTRY WHERE PACKAGING IS CHANGING FAST**

33. General Properties of Packaging for Chilled, Frozen, and Deep Frozen Products	217
34. Meats and Meats Products	233
35. Packaging of Milk Products	251
36. Biscuits, Industrial Pastries, and Other A.H.I.	277
37. Packaging for Vacuum Cooking	287

## **PART VII. METHODOLOGY AND ECONOMICS**

38. Inspection of Packaging Prior to Use: Test Methods	293
39. Testing Packaging for Transport. Constraints of the Distribution Circuit and their Simulation in the Test Laboratory	305
40. Dimensional Coordination	323
41. Aspects of the Packaging Specifications – Quality Assurance – Functional Analysis	331
42. The Quality/Price Ratio of Packaging and Its Effect on the Quality of the Final Product	341
43. Daily Experience of Packaging Problems Within an Agrofood Business – Stock Control	353

<b>Index for volumes 1 and 2</b>	<b>363</b>
