

CONTENTS

PART I. CANE GROWING	1
I. Cane Varieties and Planting Time	2
II. Row and Sett Spacing	3
III. Application of Fertilizers and Lime	4
IV. Land Preparation and Cultivation	7
V. Grass and Weed Control	8
VI. Disease and Pest Control	10
VII. Irrigation and Drainage	12
VIII. Harvesting and Ratooning	12
IX. Field Mechanization	13
X. Technical Service and Research Work	14
PART II. CANE MILLING AND SUGAR MANUFACTURE	16
I. Cane Transportation and Unloading	16
II. Cane Preparation	17
III. Cane Milling	18
IV. Juice Heating and Clarification	21
V. Evaporation, Vapour Bleeding and Syrup Treatment	24
VI. Sugar Boiling and Crystallization	25
VII. Masecuite Purging	27
VIII. Sugar Drying and Packing	28
IX. Steam and Power Generation	29
X. Chemical Control and Recovery	30
XI. Small Mills and Re-processing Factories	33
XII. Technical Service and Research Work	33
PART III. MANAGEMENT AND INDUSTRY	35
A: I. To Organize a Department of Agriculture in Each Factory	35
II. To Formulate a Maintenance Scheme for Machinery and Equipment Each Year	36
III. To Design Replacement or Modernization Program on Engineering and Technology Principles	36
IV. To Control Cost of Production	36
V. To Pay Cane on Weight and also on Quality	38
B: I. Quantity of Sugar to be Produced	38
II. Assignment of Definite Cane District to Each Factory	39
III. A Well-equipped Foundry or Iron Works for the Industry	39
APPENDIX	40
