

CONTENTS

1. Delivery, unloading and handling of cane	1
2. The cane carrier	15
3. Cane knives	23
4. Tramp iron separators	35
5. Crushers	38
6. Shredders	57
7. The combinations of cane preparators	68
8. Feeding of mills and conveying of bagasse	69
9. Roller grooving	82
10. Pressures in milling	97
11. Mill speeds	143
12. Mill capacity	150
13. Mill settings	159
14. Power requirements of mills	183
15. Steam engines for mill drives	196
16. Electric and turbine mill drives	199
17. Mill gearing	207
18. Construction of mills	213
19. Imbibition	223
20. Extraction	246
21. Milling control	251
22. Fine bagasse separators	261
23. Purification of juice	265
24. Defecation	267
25. Sulphitation	274
26. Clarification with phosphoric acid	282
27. Carbonatation	284
28. Subsidation	293
29. Juice heating	312
30. Filtration	325
31. Evaporation	348
32. Sugar boiling	459
33. Crystallisation	529
34. Centrifugal separation	547
35. Storage and drying of sugar	596
36. Sugar	604

37. Molasses	605
38. Vacuum equipment	606
39. Steam production	658
40. Steam engines	759
41. Steam turbines	772
42. Electricity	791
43. Pumps	816
44. Fluid flow in pipes	828
45. Lubricants	834
46. Buildings	838
47. Lay-out of a factory	850
48. Accounting in the sugar factory	854
