

CONTENTS

<i>Preface .</i>	<i>v</i>
<i>List of Contributors</i>	<i>ix</i>
1. The General Chemistry and Properties of Glucose Syrups G. G. BIRCH	1
2. New Technological Developments in D-Fructose Production M. SEIDMAN	19
3. Ordered Conformations of Gel-Forming Polysaccharides Obtained by X-ray Diffraction Analysis of Oriented Fibres S. ARNOW	43
4. Occurrence, Biosynthesis and Function of Some Heptuloses E. A. MCCOMB and V. V. RENDIG	61
5. Lactose Sources and Recovery T. A. NICKERSON	77
6. Nonenzymic Browning in Orange Juice and in Model Systems P. E. SHAW, J. H. TATUM and R. E. BERRY	91
7. Effect of Dietary Carbohydrate on Intestinal Transport, Insulin Status and Hepatic Enzyme Activity in the Rat S. REISER	113
8. Solubilisation of Starch Fractions in Rice Varieties During Cooking R. J. PRIESTLEY	141
9. Carbohydrate Dehydration Reactions that Affect Food Quality M. S. FEATHER	153
10. Three Ways of Making Sweet Biscuits Less Harmful to the Teeth T. H. GRENBY and J. M. BULL	169
<i>Index</i>	185
