

TABLE OF CONTENTS

	PAGE
I. GENERAL PROCEDURES AND DEFINITIONS	
OF TERMS	1
1. CHROMATOGRAPHIC APPARATUS	1
2. SELECTION OF A SUITABLE ADSORBENT.....	2
3. PACKING THE ADSORBENT COLUMN.....	5
4. OPERATION OF THE CHROMATOGRAM.....	5
5. EXTRUSION OF THE ADSORBENT COLUMN.....	7
6. LOCATION OF THE ZONES OF ADSORBED SUBSTANCES	7
7. DISSECTION OF THE ADSORBENT COLUMN.....	9
8. ELUTION OF THE ADSORBED SUBSTANCES FROM THE ADSORBENT1.....	9
9. RECOVERY OF THE ADSORBED SUBSTANCES.....	11
10. RECHROMATOGRAPHY	11
II. HISTORICAL REVIEW	12
III. APPLICATION OF THE CHROMATOGRAPHIC METHOD TO SUGARS AND SUGAR DERIVA- TIVES (with experimental details).....	19
1. THE EXPLORATORY CHROMATOGRAM.....	19
2. CHROMATOGRAPHY FOR THE RESOLUTION OF MIXTURES..	19
3. CHROMATOGRAPHY AS A CRITERION OF PURITY.....	22
4. CHROMATOGRAPHY AS A METHOD OF PURIFICATION.....	22
5. CHROMATOGRAPHY AS A CONTROL METHOD IN THE PRODUCTION OF TECHNICAL SUGAR PRODUCTS.....	24
6. CHROMATOGRAPHY AS A TOOL FOR THE QUANTITATIVE ANALYSIS OF SUGAR MIXTURES.....	25
7. CHROMATOGRAPHY AS A METHOD OF END-GROUP ASSAY.	25
8. PARTITION CHROMATOGRAPHY FOR THE RESOLUTION OF MIXTURES OF METHYL ETHERS OF D-GLUCOSE AND FOR END-GROUP ASSAY	26
9. PAPER PARTITION CHROMATOGRAPHY AS A METHOD OF END-GROUP ASSAY	27
10. RELATIONSHIP BETWEEN THE ADSORPTION AND THE FUNCTIONAL GROUPS OF SUGARS.....	28
