

CONTENTS

Chapter I	Starch-Its Past and Future	1
Chapter II	History of the Corn Starch Industry	11
Chapter III	Economics and Future of the Starch Industry	23
Chapter IV	Genic Control of Starch Development	43
Chapter V	Occurrence and Development of Starch in Plants	65
Chapter VI	Minor Constituents of Starch	105
Chapter VII	Enzymes in Synthesis and Hydrolysis of Starch	133
Chapter VIII	The Oligo- and Megalosaccharides of Starch	177
Chapter IX	Cycloamyloses	209
Chapter X	Chemical Evidence for the Structure of Starch	251
Chapter XI	Crystalline Nature of Starch	279
Chapter XII	Gelatinization of Starch	289
Chapter XIII	Organic Complexes and Coordination Compounds of Carbohydrates	309
Chapter XIV	Fractionation of Starch	331
Chapter XV	Physical Properties of Amylose and Amylopectin in Solution	349
Chapter XVI	Mechanical Properties of Starch Pastes	393
Chapter XVII	Radiation of Starch	409
Chapter XVIII	Pyrolysis of Starch	421
Chapter XIX	Nondegradative Reactions of Starch	439
Chapter XX	Acid Hydrolysis and Other Lytic Reactions of Starch	495
Chapter XXI	Alkaline Degradation of Starch	521
