<b>1 Introduction: Modifying lipids – why and how?</b> .....	<b>1</b>
<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
1.1 Introduction .....	1
1.2 What properties are desired? .....	2
1.3 Methods of modifying oils and fats .....	4
1.4 Technological methods .....	5
1.5 Biological methods .....	6
1.6 References .....	8
<b>Part I Understanding food lipid structure and composition</b> .....	<b>9</b>
<b>2 Vegetable sources of lipids</b> .....	<b>11</b>
<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
2.1 Introduction .....	11
2.2 Major vegetable sources of food lipids .....	13
2.3 Minor vegetable sources of food lipids .....	22
2.4 Extraction and uses .....	25
2.5 Future trends .....	26
2.6 Sources of further information and advice .....	26
2.7 References .....	27
<b>3 Lipids from land animals</b> .....	<b>28</b>
<i>M.R.L. Scheeder, ETH Zurich, Switzerland</i>	
3.1 Introduction .....	28
3.2 Animal fats .....	29
3.3 Milk fat .....	44
3.4 Future trends .....	50
3.5 Sources of further information and advice .....	51
3.6 References .....	52

<b>4</b>	<b>Fish oils and lipids from marine sources</b> .....	56
	<i>B. Hjaltason, EPAX AS, Iceland and G. G. Haraldsson, University of Iceland, Iceland</i>	
4.1	Introduction.....	56
4.2	Fish oils, their main characteristics and composition .....	58
4.3	Production of fish oil .....	64
4.4	Fish oil stability and protection .....	68
4.5	Commercial fish oils .....	70
4.6	Fish oil application .....	74
4.7	References .....	76
<b>5</b>	<b>Lipids from microbial sources</b> .....	80
	<i>C. Ratledge and S. Hopkins, University of Hull, UK</i>	
5.1	Introduction.....	80
5.2	Oleaginous micro-organisms, fatty acids and lipid accumulation .....	81
5.3	Large-scale cultivation of oleaginous micro-organisms, costs, oil extraction and refinement.....	84
5.4	The production of an SCO rich in $\gamma$ -linolenic acid (Oil of Javanicus) .....	90
5.5	Production of arachidonic acid-SCO .....	93
5.6	Production of DHA-rich SCOs .....	96
5.7	Prospects for other PUFA-SCOs .....	103
5.8	Future trends .....	105
5.9	References .....	109
<b>6</b>	<b>Methods of analysis to determine the quality of oils</b> .....	114
	<i>K. Warner, National Center for Agricultural Utilization Research, USA</i>	
6.1	Introduction.....	114
6.2	Methods to measure compositional attributes.....	115
6.3	Methods of measuring characteristics of edible oils .....	119
6.4	Future trends .....	124
6.5	Sources of further information and advice.....	125
6.6	References .....	125
<b>7</b>	<b>Selected topics in the chemistry and biochemistry of lipids</b> .....	128
	<i>F. Gunstone, Scottish Crop Research Institute, UK</i>	
7.1	Introduction.....	128
7.2	Partial hydrogenation .....	128
7.3	Autoxidation, photo-oxidation, and antioxidants.....	130
7.4	Reactions of esters and other acyl compounds .....	137
7.5	Metabolism of linoleic and linolenic acids .....	138
7.6	Sources of further information and advice.....	140
7.7	References .....	141

<b>8</b>	<b>Structure and properties of fat crystal networks</b> .....	142
	<i>S. Martini, T. Awad and A. G. Marangoni, University of Guelph, Canada</i>	
8.1	History and introduction .....	142
8.2	Crystallization and melting .....	143
8.3	Mechanical properties and structure .....	152
8.4	Fat crystal networks and microstructure .....	155
8.5	Structuring fat crystal network using processing .....	162
8.6	Future trends .....	165
8.7	References .....	166
<b>Part II</b>	<b>Modifying lipids for use in food</b> .....	171
<b>9</b>	<b>Hydrogenation of lipids for use in food</b> .....	173
	<i>G. R. List, National Center for Agricultural Utilization Research, USA and J. W. King, University of Arkansas, USA</i>	
9.1	Introduction .....	173
9.2	<i>Trans</i> fatty acid contents of food oils .....	174
9.3	Formulation of food oils by hydrogenation (soybean-based) .....	176
9.4	Source oils for <i>trans</i> fatty acids .....	185
9.5	Mechanism of hydrogenation/isomerization .....	187
9.6	Future trends .....	190
9.7	Alternatives to hydrogenation: low and zero <i>trans</i> fats ..	192
9.8	References .....	194
<b>10</b>	<b>Fractionation of lipids for use in food</b> .....	201
	<i>V. Gibon, De Smet Technologies and Services, Belgium</i>	
10.1	Introduction .....	201
10.2	Different fractionation techniques .....	201
10.3	Crystallization of fats .....	206
10.4	The dry fractionation process .....	208
10.5	Applications .....	214
10.6	Future trends .....	227
10.7	References .....	229
<b>11</b>	<b>Chemical and enzymatic interesterification of lipids for use in food</b> .....	234
	<i>X. Xu, Z. Guo, H. Zhang, A. F. Vikbjerg and M. L. Damstrup, Technical University of Denmark, Denmark</i>	
11.1	Introduction .....	234
11.2	Intesterification in general practice: an introduction of potential reactions and applications .....	235
11.3	Typical interesterification in lipid modification .....	239
11.4	Remarks and future trends .....	263
11.5	Sources of further information and advice .....	265
11.6	Acknowledgements .....	266
11.7	References .....	266

<b>12</b>	<b>Plant breeding to change lipid composition for use in food</b>	<b>273</b>
	<i>D. J. Murphy, University of Glamorgan, UK</i>	
12.1	Introduction .....	273
12.2	General perspective .....	274
12.3	Plant breeding .....	278
12.4	Oil crop modification .....	283
12.5	Transgenic oil crop modification .....	289
12.6	Plant lipid manipulation in the 21 <sup>st</sup> century .....	293
12.7	Future trends .....	299
12.8	Sources of further information and advice .....	300
12.9	References .....	302
<b>13</b>	<b>Modifying fats of animal origin for use in food</b>	<b>306</b>
	<i>M.R.L. Scheeder, ETH Zurich, Switzerland</i>	
13.1	Introduction .....	306
13.2	Motivation for bio-modification of animal lipids .....	307
13.3	Specific bioactive fatty acids in animal products .....	308
13.4	Genetic effects on the composition of animal lipids .....	310
13.5	Housing and temperature effects on adipose tissue composition .....	314
13.6	Methods of modifying animal fats by changes in diet ...	314
13.7	Technological modifications .....	324
13.8	Modified animal fats: the relevance of fortifying functional fatty acids in animal lipids .....	327
13.9	Future trends .....	328
13.10	Sources of further information and advice .....	329
