

CONTENTS

Introduction	1
The Total Synthesis of Synthetically Interesting Perfumery Natural Products	5
1. Introduction	5
2. Vetiver Oil	6
3. Orris Oil	19
4. Patchouli Oil	23
5. Osmanthus Oil	27
6. Abbreviations	31
7. References	31
Advances in the Transition Metal (Rh, Ru)-BINAP-Catalysed Asymmetric Synthesis of Chiral Compounds for Flavours and Fragrances and Their Associated Sensory Properties	33
1. Introduction	33
2. Asymmetric synthesis of chiral compounds for flavours and fragrances catalysed by (Rh, Ru)-BINAP complex and their associated sensory properties	34
3. Summary	56
4. Acknowledgements	56
5. References	57
Towards Environmentally Friendly Chemical Processes	59
1. Introduction	59
2. The E-Factor and atom efficiency	59
3. The role of catalysis	60
4. Catalytic reduction	62
5. Catalytic oxidation	63
6. Catalytic C-C bond formation	65
7. Catalysis with solid acids and bases	67
8. Catalytic conversions in non-conventional media	69
9. Biocatalysis	72
10. Asymmetric catalysis	73
11. Concluding remarks	75
12. References	76

Advances in the Industrial Synthesis of Medium to Large Ring Molecules	79
1. Introduction	79
2. Synthesis and macrocyclisation of bifunctional chains	81
3. Macrocycles via ring expansion	88
4. Macrocycles via cyclooligomerisation	91
5. Summary	93
6. References	94
 Analysis Technology	 97
1. Introduction	97
2. Sample preparation	97
3. Qualitative analysis	106
4. Quantitative analyses	111
5. Data banks	115
6. Conclusions	116
7. Bibliography	116
 Flavour Matrix Interactions	 123
1. Introduction	123
2. Interactions of volatile flavours with aqueous solutions	126
3. Interactions with starch	130
4. Oil-water partition	133
5. Interactions of volatile flavours with proteins	133
6. Encapsulation	134
7. Conclusion	135
8. Acknowledgements	135
9. Bibliography	135
 Biotransformations in the Flavour Industry	 139
1. Summary	139
2. Introduction	140
3. Problems encountered in flavour biotransformation studies	141
4. Advantages of biotransformation	142
5. Toxicity / solvent tolerance	143
6. Genetic engineering: success and perspectives	146
7. Process development	150
8. Economic considerations	165
9. Acknowledgements	167
10. References	167

Lipid Derived Flavours	171
1. Introduction	171
2. Non-enzymatic lipid oxidation	172
3. Enzymatic lipid oxidation	181
4. Lipids as a source of positive and negative flavours in food	187
5. References	208
 Safety and Legislation of Flavourings	 215
1. Introduction	215
2. System of regulation	216
3. Definitions	217
4. Labelling	218
5. Suitable flavouring substances	220
6. Safety evaluation of flavouring substances	223
7. Future developments	227
8. References	227
