

CONTENTS

1. Advances in Fruit Flavor Research: An Overview	1
ANALYTICAL AND SENSORY CHARACTERIZATION OF FRUIT FLAVORS	
2. Analytical Investigation of the Flavor of Cupuacu (<i>Theobroma gradiflorum Spreng.</i>)	8
3. Chemical and Sensory Correlations for Orange Juice	21
4. Multivariate Analysis for Classification of Commercial Orange Juice Products by Volatile Constituents Using Headspace Gas Chromatography	33
5. Characterization of Carambola and Yellow Passion Fruit Essences Produced by a Thermally Accelerated Short-Time Evaporation Citrus Evaporator	48
6. Volatile Compounds Affecting Kiwifruit Flavor	59
AUTHENTICATION OF FRUIT FLAVORS	
7. Detection of Adulterated Fruit Flavors	70
8. Multisite and Multicomponent Approach for the Stable Isotope Analysis of Aromas and Essential Oils	79
9. New Methods To Assess Authenticity of Natural Flavors and Essential Oils	94
UNDERSTANDING FRUIT FLAVORS: BIOGENESIS AND BIOTECHNOLOGY	
10. Starfruit (<i>Averrhoa carambola</i> L.): Attractive Source for Carotenoid-Derived Flavor Compounds	114
11. In Vivo In Vitro Flavor Studies of <i>Vitis labruscana</i> Cv. Concord	127
12. Substrate Specificity of Alcohol Acyltransferase from Strawberry and Banana Fruits	134
13. Bioconversion of Citrus <i>d</i> -Limonene	142
14. Ester Biosynthesis in Relation to Harvest Maturity and Controlled-Atmosphere Storage of Apples	149
FRUIT FLAVOR PRECURSORS	
15. Studies on Tomato Glycosides	164
16. Free and Bound Volatile Components of Temperate and Tropical Fruits	182
17. Developments in the Isolation and Characterization of β -Damascenone Precursors from Apples	190
PACKAGING AND STORAGE INTERACTIONS	
18. Flavor-Package Interaction: Assessing the Impact on Orange Juice Quality	202
19. Off-Flavor Development of Apples, Pears, Berries, and Plums Under Anaerobiosis and Partial Reversal Air	211

ENVIRONMENTAL, MATURITY, AND VARIETAL FLAVOR DIFFERENCES

20. Vegetative Flavor and Methoxypyrazines in Cabernet Sauvignon	226
21. Dynamic Headspace Gas Chromatography-Mass Spectrometry Analysis of Volatile Flavor Compounds from Wild Diploid Blueberry Species	235
22. Key Aroma Compounds in Melons: Their Development and Cultivar Dependence	248
23. Chiral γ -Lactones, Key Compounds to Apricot Flavor: Sensory Evaluation, Quantification, and Chirospecific Analysis in Different Varieties	258
24. 2,5-Dimethyl-4-hydroxy-3(2H)-furanone and Derivatives in Strawberries During Ripening	268
25. Characterization of the Putrid Aroma Compounds of <i>Ginkgo biloba</i> Fruits	276
