

CONTENTS

Introduction	1
High Cell Density Fermentations	3
Yeast Strains for Baking: Recent Developments	13
Brewing and Distilling Yeasts	55
Grape Must Fermentation: Past and Present	105
Food Spoilage Yeasts	124
Yeasts in Fermented Foods	167
Yeasts-Diverse Substrates and Products	199
Yeasts in Cheesemaking	228
Food Yeast	241
Industrial Utilization of Yeast in Brazil	266
Calorimetry for Yeast Fermentation Monitoring and Control	276
Protoplast Fusion: Application to Industrial Yeasts	348
Mutagenesis Principles and Strategies Applied to Yeast	355
Heterologous Protein Production from Yeast	366
Subject Index	387
