

CONTENTS

Preface	vii
1. Progress in Animal Flavor Research	1
2. Food Preference Behavior in Birds and Mammals	21
3. Methodology of Behavioral Testing Associated with Development in Animal Foods	43
4. Isolation, Identification, and Biological Activity Assay of Chemical Fractions from Estrus Urine Attractive to the Coyote	66
5. Bacterial Action and Chemical Signalling in the Red fox	78
6. Biochemical and Physiological Aspects of Animal Behavior: Taste and Smell	92
7. Flavor Chemistry of Carnivore Taste Systems	102
8. Development of Diets for Food-Producing Animals	129
9. Developing Palatable Foods for Domestic Pets	141
10. Repellents to Protect Crops from Vertebrate Pests: Some Considerations for Their Use and Development	150 167
