

Contents

Contributors	xi
Preface	xv
<hr/>	
1 Celiac disease	1
<i>Carlo Catassi and Alessio Fasano</i>	
Introduction	1
Epidemiology	2
The iceberg model	6
Pathogenesis	8
Clinical spectrum	10
Complications	13
Diagnosis	14
Management	17
Novel strategies for disease prevention and treatment	20
Wheat allergy	21
Conclusions	22
References	22
2 Labeling and regulatory issues	29
<i>Hertha Deutsch, Roland Poms, Heereluurt Heeres, and Jan-Willem van der Kamp</i>	
Introduction	29
Codex Alimentarius	30
National legislation	31
Draft Revised Codex Standard for Gluten-free Foods	34
Further Codex Standards and Guidelines	36
Codex Standard for Processed Cereal-Based Foods for Infants and Young Children	39
Food labeling and awareness	40
Contamination	40
Product liability and food safety	41
Cautionary statements and disclaimers—helpful for consumers?	42

	Conclusion	44
	References	44
3	Detection of gluten	47
	<i>Herbert Wieser</i>	
	Introduction	47
	The precipitating factor	49
	Protein extraction	54
	Reference protein	57
	Immunochemical methods	58
	Polymerase chain reaction	67
	Mass spectrometry	69
	Column chromatography	70
	Conclusions and future trends	71
	Sources of further information and advice	72
	References	72
4	Rice	81
	<i>Cristina M. Rosell and Cristina Marco</i>	
	Introduction	81
	Production of rice flours and their properties	84
	Production and characterization of gluten-free cereal products based on rice	90
	Future trends	94
	Sources of further information and advice	95
	References	96
5	Sorghum and maize	101
	<i>T. J. Schober and S. R. Bean</i>	
	Introduction	101
	Physical grain properties	101
	Chemical composition	104
	Milling	107
	Gluten-free food production	108
	Snack foods	111
	Future trends	112
	Further information and advice	113
	References	113
6	Gluten-free foods and beverages from millets	119
	<i>John R. N. Taylor and M. Naushad Emmambux</i>	
	Introduction	119
	Review of the more important millet species	121
	Traditional foods and beverages	130
	Traditional millet-processing technologies	134
	Recent and future trends	137
	Concluding remarks	140

Sources of further information and advice	141
References	141
7 Pseudocereals	149
<i>Regine Schoenlechner, Susanne Siebenhandl, and Emmerich Berghofer</i>	
Introduction	149
Chemical composition	150
Amaranth	151
Quinoa	161
Buckwheat	166
Production and characterization of gluten-free cereal products based on pseudocereals	174
Conclusions	175
References	176
8 Oat products and their current status in the celiac diet	191
<i>Tuula Sontag-Strohm, Pekka Lehtinen, and Anu Kaukovirta-Norja</i>	
Introduction	191
Gluten-free status of oats	192
Oat products	195
Oat milling fractions	195
Consumer products containing oats: technology and challenges	196
How to analyze the gluten-free status of oat products	198
Future trends and conclusions	199
References	199
9 Hydrocolloids	203
<i>James N. BeMiller</i>	
Introduction	203
Hydrocolloids that can effect gelation	203
Thickening and water-binding properties of hydrocolloids	205
Specific hydrocolloids	207
Conclusions	213
References	214
10 Dairy-based ingredients	217
<i>Constantinos E. Stathopoulos</i>	
Introduction	217
Production and properties of dairy ingredients: an overview	218
Application of dairy ingredients in gluten-free food	228
Problems associated with the incorporation of dairy ingredients in gluten-free cereal products	230
Future trends	231
Sources of further information and advice	231
References	232

11	Use of enzymes in the production of cereal-based functional foods and food ingredients	237
	<i>Hans Goesaert, Christophe M. Courtin, and Jan A. Delcour</i>	
	Introduction	237
	Non-starch polysaccharide-derived functional food ingredients	238
	Starch-derived functional food ingredients	247
	Cereal protein-related functional food aspects	251
	Final remarks	255
	References	256
12	Sourdough/lactic acid bacteria	267
	<i>Marco Gobbetti, Maria De Angelis, Raffaella Di Cagno, and Carlo Giuseppe Rizzello</i>	
	The sourdough	267
	Sourdough lactic acid bacteria	268
	Sourdough properties and functions	268
	Applications of sourdough in gluten-free products	274
	Sourdough lactic acid bacteria as a tool for detoxifying gluten	275
	Future trends	282
	Sources of further information and advice	282
	References	283
13	Gluten-free breads	289
	<i>Elke K. Arendt, Andrew Morrissey, Michelle M. Moore, and Fabio Dal Bello</i>	
	Introduction	289
	The gluten-free diet	290
	The role of gluten in bakery products	291
	Gluten-free bread ingredients	292
	Nutritional improvement of gluten-free breads	304
	Gluten-free bread production	306
	Improvement of gluten-free bread quality	308
	Enzymes	308
	Sourdough and its role in improving gluten-free bread quality	309
	Conclusions	310
	References	311
14	Formulation and nutritional aspects of gluten-free cereal products and infant foods	321
	<i>Eimear Gallagher</i>	
	Introduction	321
	Biscuit, confectionery, and pasta products	322
	Biscuit and cookies	323
	Cake	329
	Pasta and extruded products	332
	Pizza	337
	Nutritional aspects of gluten-free products	339

Conclusions	341
References	341

15 **Malting and brewing with gluten-free cereals** 347

Blaise P. Nic Phiarais and Elke K. Arendt

Introduction	347
Gluten-free cereals	350
Malting of gluten-free cereals	352
Brewing of gluten-free cereals	358
Conclusion	364
References	365

16 **Cereal-based gluten-free functional drinks** 373

Stefan Kreisz, Elke K. Arendt, Florian Hübner, and Martin Zarnkov

Introduction	373
Evaluation of cereals or pseudocereals as base for (functional) drinks	376
Germination and drying (malting, optional)	378
Substrate production	378
Fermentation (optional)	379
Blending and stabilization	379
Potentially functional compounds in cereals and pseudocereals	380
Possible additives for functional beverages	388
Conclusions	388
References	389

17 **The marketing of gluten-free cereal products** 393

Joe Bogue and Douglas Sorenson

Introduction	393
Overview of the gluten-free market	394
Gluten-free market trends	394
Marketing issues and novel foods	396
The gluten-free target market	397
The marketing mix and gluten-free cereal products	399
Conclusions	407
Sources of further information and advice	407
References	408

18 **New product development: the case of gluten-free food products** 413

Alan L. Kelly, Michelle M. Moore, and Elke K. Arendt

Introduction to new product development	413
NPD in the gluten-free sector	414
Stage 1: The idea stage	418
Stage 2: The formulation stage	419
Stage 3: Process development	421
Stage 4: Initial testing and viability assessment	422
Stage 5: Shelf-life testing	425

Stage 6: Scale-up and consumer testing.....	427
Stage 7: Packaging and labeling	427
Conclusions	429
References	430
