<i>Preface</i>	<i>xv</i>

Part I Food and obesity

1 Lipid metabolism: its role in energy regulation and obesity	3
<i>M. Leonhardt and W. Langhans, ETH Zurich. Switzerland</i>	
1.1 Introduction	3
1.2 Lipid metabolism: from digestion and synthesis to storage	4
1.3 Adiposetissue	5
1.4 <i>De novo</i> lipogenesis	9
1.5 Future trends	16
1.6 References	17
2 Hunger and satiety: relation to body weight control	28
<i>H. F. J. Hendriks, G. C. M. Bakker, W. J. Pasman, A. Stafleu and W. A. M. Blom, TNO Quality of Life. The Netherlands</i>	
2.1 Introduction	28
2.2 Factors influencing satiety and satiation	29
2.3 The impact of different food components on satiety	32
2.4 The need for biomarkers of satiety	35
2.5 Developing new biomarkers	36

5.6	Future trends.....	121
5.7	References.....	122

Part II Ingredients from grains, fruits and vegetables for weight control

6	β-Glucans	131
	<i>J.-A. Nazare, M. Laville Centre de Recherche en Nutrition Humaine Rhône Alpes, France. C. G. Biliaderis. A. Lazaridou. Aristotle University. Thessaloniki. Greece. G. Onning, Lund University. Sweden. M. Salmenkallio-Marttila, VTT, Finland and A. Triantafyllou, Ceba Foods. Sweden</i>	
6.1	Introduction.....	131
6.2	Sources of β -glucans.....	131
6.3	β -Glucan structure and related properties.....	133
6.4	Effects of β -glucans on lipid metabolism.....	135
6.5	Effects of β -glucans on energy and carbohydrate metabolism.....	138
6.6	β -Glucans and weight control.....	140
6.7	β -Glucans in the regulation of satiety and acceptance by consumers.....	141
6.8	Use of β -glucans in food products.....	143
6.9	Future trends.....	145
6.10	Acknowledgements.....	145
6.11	References.....	145
7	Non-digestible oligosaccharides	153
	<i>N. M. Delzenne, P. D. Cani, E. Delmée and A. M. Neyrinck. Université catholique de Louvain. Belgium</i>	
7.1	Introduction.....	153
7.2	Dietary fibres and food intake.....	153
7.3	Sources and properties of non-digestible oligosaccharides.....	155
7.4	Effect of non-digestible oligosaccharides on glucose and lipid metabolism: a phenomenon linked to a decrease in food intake.....	158
7.5	Non-digestible oligosaccharides. food intake and weight control: a key role for gastro-intestinal peptides.....	160
7.6	The role of glucagon-like peptide-1 in the improvement of food intake. fat development and diabetic state by non-digestible oligosaccharides.....	164
7.7	Relevance of non-digestible oligosaccharide effects in human studies.....	165
7.8	Conclusions and future trends.....	167
7.9	References.....	168

8	Resistant starch	174
	<i>A. M. Birkett, National Starch Food Innovation. USA and I. L. Brown, University of Colorado Health Sciences Center. Denver. Colorado. USA</i>	
8.1	Introduction.....	174
8.2	Background.....	175
8.3	Role of resistant starch in weight management.....	182
8.4	Increasing the resistant starch content of foods	189
8.5	Sources of further information and advice.....	192
8.6	Future trends.....	192
8.7	Conclusion.....	193
8.8	References.....	193
9	Modified carbohydrates with lower glycemic index	198
	<i>B. R. Hamaker, G. Zhang and M. Venkatachalam, Purdue University. USA</i>	
9.1	Introduction.....	198
9.2	Methods of producing carbohydrates with lower glycemic index.....	200
9.3	Slow-digestion and digestion-resistant characteristics of raw starch	200
9.4	Starch structural modification.....	203
9.5	Influence of other food components.....	207
9.6	Future trends.....	212
9.7	References.....	213
10	Novel ingredients for weight loss: new developments	218
	<i>J. D. Stowell, Danisco Sweeteners. UK</i>	
10.1	Introduction.....	218
10.2	Criteria for a successful new ingredient for weight loss...	220
10.3	(-)-Hydroxycitric acid	222
10.4	<i>Hoodia gordonii</i>	225
10.5	Other (potential) weight loss ingredients.....	228
10.6	Future trends.....	230
10.7	References.....	231

Part III Dairy ingredients and lipids for weight control

11	Dietary and supplemental calcium and its role in weight loss: weighing the evidence	237
	<i>G. Gerstner, Jungbunzlauer Ladenburg GmbH. Germany and M. de Vrese, Federal Research Center for Nutrition and Food. Germany</i>	
11.1	Introduction: role of dietary and supplementary calcium in weight control	237

11.2	Determining the role of calcium in weight control	238
11.3	Mechanisms: calcium and the regulation of energy metabolism	245
11.4	Dietary versus supplementary calcium and weight control	247
11.5	Using calcium in functional food products	248
11.6	Conclusions and future trends	256
11.7	Sources of further information and advice	257
11.8	References	258
12	Conjugated fatty acids, body composition and weightcontrol	263
	<i>J. L. Sebedio, UMR, 1019, INRA-Université d'Auvergne, France</i>	
12.1	Introduction	263
12.2	Sources of conjugated linoleic acid and estimated daily intake	264
12.3	Effect of conjugated linoleic acid on body composition	267
12.4	Safety issues	272
12.5	Conclusions: conjugated linoleic acid and functional foods	275
12.6	References	276
13	Omega3 fatty acids and other polyunsaturated fatty acids and weight control	281
	<i>M. Sorhede Winzell and B. Åhrén, Lund University, Sweden</i>	
13.1	Introduction	281
13.2	Determining the role of omega-3 fatty acids and other polyunsaturated fatty acids in weight control	282
13.3	Effects of omega-3 fatty acids and other polyunsaturated fatty acids on energy metabolism and other factors connected to weight control	289
13.4	Producing omega-3 polyunsaturated fatty acids	294
13.5	Omega-3 and other polyunsaturated fatty acids in functional food products	295
13.6	Future trends	295
13.7	Sources of further information and advice	297
13.8	Acknowledgements	297
13.9	References	298
14	Medium-chain and structured triglycerides: their role in weight control	305
	<i>I. Rudkowska and P. J. H. Jones, University of Manitoba, Canada</i>	
14.1	Introduction: medium-chain triglycerides and weightcontrol	305

x Contents

14.2	Metabolic effects of medium-chain triglycerides related to weight control	307
14.3	Effects of structured lipids related to weight control	317
14.4	Producing oils and using medium-chain triglycerides.....	318
14.5	Future trends.....	321
14.6	Sources of further information and advice.....	322
14.7	References.....	323
15	Trans-free oils and fats	326
	E. Floter and G. van Duijn, <i>Unilever</i> Research and Development <i>Vlaardingen</i> , The Netherlands	
15.1	Introduction.....	326
15.2	Requirements for trans-free fat compositions	333
15.3	Production of trans-free fats and their application	335
15.4	Implementation of trans-free fats in manufacturing and the supply chain	341
15.5	Future trends.....	342
15.6	Conclusions.....	342
15.7	References.....	343
	Index	345
