

CONTENTS

Chapter I. INTRODUCTION	1
SECTION A – ENGINEERING	
II. Theoretical considerations	9
III. Development of specifications	18
IV. The Mark I prototype AFD plant	30
V. The drying operation	40
VI. Packaging	49
VII. Economics of the process	63
VIII. Possible future developments	73
SECTION B – FOOD TECHNOLOGY	
IX. Choice of raw materials	81
X. Preparation of foodstuffs for drying	92
XI. Storage behaviour of dehydrated foods	109
XII. Reconstitution and cooking	124
XIII. Nutritive value	132
XIV. Quality control	138
