

CONTENTS

SESSION 1: TECHNOLOGICAL ASPECTS OF THE RADIATION PRESERVATION AND STERILIZATION OF FOODS

World-Wide Status of the Treatment of Foods by Ionizing Energy	3
Need for International Cooperation	17
The Work of the OECD's European Nuclear Energy Agency (ENEA) in Food Irradiation	23
Prospects for Radiation Preservation of Foods in Britain	25
European Radiation Preservation of Fruits and Vegetables	31
Irradiation of Fruits and vegetables	39
Radiation Preservation of Fish and shellfish of the Northeast Pacific and Gulf of Mexico	53
Radiation Preservation of Fish of the Northwest Atlantic and the Great Lakes	69
Radiation Preservation of Ham and Other Cured Meats	81
Radiation Preservation of Fresh Meat and Poultry	87
Packaging Aspects of Radiation Preservation of Foods	99
Troop-Acceptance Testing of Irradiated Foods	109
Chemical Changes in Irradiated Meats	121
Sprout Inhibition of Vegetables Using Gamma Radiation	127

SESSION 2: SOURCE FACILITIES AND TECHNOLOGY

Isotopic Sources	143
Electron Accelerators for Food Processing	149

SESSION 3: WHOLESOMENESS AND FOOD LEGISLATION

Introductory Remarks	183
Data on Wholesomeness Studies: A Progress Report	185
Wholesomeness Considerations in Radiation Preservation of Foods	191
Aspects of Food Legislation in Canada Relative to Wholesomeness	199
Some International Aspects of Wholesomeness of Irradiated Foods	205

SESSION 4: MICROBIOLOGICAL ASPECTS OF IRRADIATION PRESERVATION OF FOODS

The Potential Problems of Type-E Botulism in Radiation-Preserved Seafoods	211
A Survey of the Status of Clostridium Botulinum Research	217
Principles of Microbiological Safety and Stability of Radiation-Sterilized Foods	223
The Use of Pasteurizing Doses of Gamma Radiation for the Destruction of salmonellae and Other Enterobacteriaceae in Some Foods of Low Water Activity	233
The Salmonellosis Problem and Prospects for the Irradiation Treatment of Foods	265
Viruses and Rickettsia in Foods and the Possible Role of Radiation Preservation	269

SESSION 5: CONFERENCE SUMMATION

Summary and Trends	277
--------------------	-----

APPENDIX

The USAEC Program on Food Irradiation	283
Facilities Supporting AEC Food-Irradiation Research	303
Wholesomeness, Microbiological, and Biochemical Aspects of the AEC Radiation Pasteurization of Foods Program	315
The Clearance of Gamma-Irradiated Wheat and the International Importance of this Act	325
An Evaluation of Dosimetry Procedures Applicable for Use in Food Irradiation	361
Preservation of Meats by Sterilizing Doses of Ionizing Radiation	383
International and Technical Aspects of the Food-Irradiation Program of the Joint IAEA-FAO Division of Atomic Energy in Agriculture	411
Growing Points in Food Science	415
Business Opportunities and Responsibilities in Food Irradiation	419
