

CONTENTS

ACTION OF MICROBIAL INHIBITORS IN FOODS

Mechanism of antimicrobial effect of various food preservatives	3
Effect of food preservatives on the growth of bacteria from spores	17
The inhibitory action of nisin on <i>Bacillus stearothermophilus</i>	25
Mechanism of inhibition of bacillus spores by unsaturated fatty acids	35
The action of N α -acyldipeptides on microorganisms	47
Action of anthocyanin and related compounds on bacterial cells	59
On the action of diethylpyrocarbonate on microorganisms	77
The effect of tylosin on spoilage patterns of inoculated and noninoculated cream style corn	87
Spoilage patterns in clostridium botulinum-inoculated canned foods treated with tylosin	97
The antimicrobial action of sulphurous acid	105
L'acide sulfureux sensibilisateur des levures aux radiations ionisantes	117

USE OF MICROBIAL INHIBITORS IN FOODS

Quantitative aspects of free and bound sulphur dioxide in cider	133
Investigations of the distribution of preservatives between fat and Water in foods	139
Some causes of unreliability of essential oils as microbial inhibitors in foods	145
Limitations of nisin as a preservative in non-dairy foods	151
Pimaricin, a new food fungistat	167
The use of macrolide antifungal antibiotics in delaying spoilage of fresh small fruits and tomatoes	185
Utilisation d'un inhibiteur microbien dans le traitement des fruits et des legumes vers de nouvelles conceptions en matiere de jus de fruits	199
Factors affecting the use of mould inhibitors in bread and cake	211
Die biochemischen und bakteriellen Ursachen der Bombagen von Marinaden und die Aspekte ihrer Verhinderung	221
The microflora of semi-preserved fish products and the use of chemical preservation	231
Changes in the spoilage flora during preservation of fish with antibiotics	245
Stability of chlortetracycline and tylosin in tissues	261

NATURAL OCCURRENCE OF MICROBIAL INHIBITORS IN FOODS

Protamines from fishes as inhibitors on the growth of microorganisms	271
Les substances antibacteriennes du lait cru et leur role en technologie laitiere	281
An inhibitory system-lactoperoxidase/thiocyanate/peroxide- in raw milk	297
Natural antibiosis in some varieties of soft surface ripened cheese	307

GENERAL PAPERS

The application of interference microscopy to the study of inhibition of microbial growth	323
Antibacterial effects of smoke constituents on bacteria isolated from bacon	333
The effect of heated sugar solutions on the growth of the Clostridium species P.A. 3679	347
Observations on heat-induced inhibitory and stimulatory factors on Microbacterium lacticum	353
Presumptive microbiological detection of fraudulently added antimicrobial substances in foods and beverages	369
General microbiological considerations in the choice of anti-microbial food preservatives	381
Conclusions and recommendations	393
Beschliessungen und Empfehlungen	395
Conclusions et recommendations	397
List of active participants of the Symposium	399
