

## CONTENTS

1. Proximate Composition	1
2. Pectin	21
3. Polyphenols	55
4. Plant Pigments	72
5. Ascorbic Acid	94
6. Minerals	102
7. Examination of Canned Products	135
8. Tomato Products	141
9. Dehydrated Fruits and Vegetables	169
10. Vinegar	186
11. Chemical Additives	196
12. Colour Measurement	236
13. Measurement of Consistency	269
14. Sensory Evaluation	281
15. Miscellaneous Methods	308
16. Water Analysis	337
17. Tinplate and Lacquers	382
18. Double Seaming—Adjustment and Examination	416
19. General Instructions in Microbiological Examination	426
20. Microbiological Examination of Spoilage	436
21. Micro-Analytical Examination for Extraneous Matter	455
22. Bacteriological Examination of Water	475
23. Determination of Thermal Process Time	484
24. Assessment of Surface Sanitation	572
25. Standard Solutions	576
26. Tables	581
