

**CONTENTS**

1. Biology of Seafish Production	1
2. World Fisheries	41
3. Fish Cultivation in Europe	77
4. Carp Cultivation in Japan	103
5. Raising Fish for Food in Southeast Asia	121
6. Organic Constituents of Fish and Other Aquatic Animal Foods	145
7. Biochemistry of Fish Oils	211
8. Recent Findings in Fatty Acid Composition of Marine Oils	259
9. Fish Proteins with Special Reference to Freezing	275
10. The Histamine Problem	329
11. Nonprotein Nitrogenous Compounds	353
12. Rigor Mortis in Fish	385
13. Vitamins in Fish-with Special Reference to Edible Parts	411
14. The Microbiology of Sea-Water Fish	487
15. Microbiology of Shellfish Deterioration	561
16. The Spoilage of Fresh-Water Fish	613
17. Chemical Control of Microbiological Deterioration	639
