

CONTENTS

PART I-FISHES AND FISHERY METHODS	
1. Characteristics of Fishes	3
2. Conservation of Marine Resources	13
3. Distribution and Description of Fisheries	22
4. Fishing Gear and Methods	41
PART II-DESCRIPTION OF IMPORTANT FISHERIES AND THEIR PRODUCTS	
5. The Bottom Fisheries	63
6. Lake and River Fisheries	79
7. The Tuna Industry	87
8. The Salmon Fisheries	107
9. The Halibut Fisheries	120
10. The Sardine, Mackerel, and Herring Fisheries	131
11. The Menhaden Fishery	146
12. The Shrimp Fishery	160
13. The Oyster Clam, Scallop, and Abalone Fisheries	183
14. The Crab and Lobster Fisheries	193
15. Marine Mammals	209
PART III-FISHERY INDUSTRIAL PRODUCTS	
16. Processing Fish Meal and Oil	219
17. Processing Animal Feed	236
18. Processing Marine Plant Products	240
19. Miscellaneous Industrial Products	247
20. Fish Meal Quality	253
21. Uses of Industrial Fish Oils	260
PART IV-PRESERVATION METHODS	
22. Handling Fresh Fish	275
23. Freezing and Cold Storage	288
24. Canned Fishery Products	309
25. Cured Fishery Products	323
PART V-FOOD SCIENCE APPLICATIONS	
26. Composition of Fish	339
27. Bacteriological and Chemical Basis for Deteriorative Changes	350
28. Nutritive Value and Quality of Fish	362
29. Analytical Methods	369
General Bibliography	375
Index	383
