| | |
|---|----|
| LIST OF TABLES | v |
| LIST OF FIGURES | vi |
| INTRODUCTION | 1 |
| LITERATURE REVIEW | 2 |
| Meat Emulsions | 2 |
| Role of Protein Type and Source | 3 |
| Protein Solubilization | 4 |
| Mechanical Action | 4 |
| Ionic Strength | 5 |
| pH | 7 |
| Temperature | 8 |
| Vacuum | 8 |
| Preblending | 9 |
| METHODS AND MATERIALS | 10 |
| Source of Meat | 10 |
| Source of Sodium Chloride (Salt) | 11 |
| Processing | 11 |
| Determination of Soluble Phase | 13 |
| Determination of pH | 14 |
| Blend Stability | 14 |
| Determination of Protein in the Soluble Phase | 14 |
| Sodium Dodecyl Sulfate Polyacrylamide Gels | |
| Electrophoresis (SDS-PAGE) | 16 |
| Isoelectric Focusing in Polyacrylamide Gels | 19 |
| Gel Densitometry | 22 |
| Statistical Design | 22 |
| Data Analysis | 24 |
| RESULTS AND DISCUSSION | 25 |
| Effects of NaCl Type | 25 |
| Effects of Blending Time | 30 |
| Effects of Post-Blending Storage Time | 36 |
| Blending Time by Post-Blending Storage Time Interaction | 42 |
| SUMMARY | 44 |
| BIBLIOGRAPHY | 46 |
| APPENDICES | 52 |
