

CONTENTS

FOREWORD	
BY PROF. S. A. GOLDBLITH	V
PREFACE	IX
CHAPTER 1. INTRODUCTION	I
CHAPTER 2. CHLOROPHYLL	6
OCCURCE, 6 - STRUTURE, 7 - BIOGENESIS, IO -BEHAVIOR OF CHLOROPHYLL DURING FOOD PROCESSING, 12 - ARTIFICIAL RIPENING OF FRUITS, I4	
CHAPTER 3. CAROTENOIDS	18
OCCURRENCE, 18 - STRUCTURE, 19 - BIOSYNTHESIS, 23 - THE BREAKDOWN OF CAROTENOID SUBSTANCES, 24 - FUNCTIONS OF CAROTENOIDS, 26	
CHAPTER 4. PHOTOSYNTHESIS	28
ACTIVATION ENERGY, 28 - LIGHT, 31 - THE VARIOUS STAGES OF PHOTOSYNTHESIS, 35 - FORMATION OF PRIMARY CARBOHYDRATES, 37-THE CALVIN CYCLE, 40 – INDUSTRIAL PHOTOSYNTHESIS, 42	
CHAPTER 5. CARBOHYDRATES-MONOSACCHARIDES	46
OCCURRENCE, 46 – CLASSIFICATION, 46 – HEXOSES, 47 – ISOMERIZATION, 48 – STRUCTURE, 51 – REDUCING POWER OF SUGARS, 53 - HEXOSE DERIVATIVES, 54 – PENTOSES, TRANSFORMATION OF SUGARS,56	
CHAPTER 6. FERMENTATION	61
THE EMBDEN – MEYERHOF SCHEME, 63 – SOME YEAST ENZYMES, 64 – THE ENERGETICS OF FERMENTATION, 65 – OTHER FERMENTATIONS, 66 – PASTEUR EFFECT, 68 – BY-PRODUCTS OF ALCOHOLIC FERMENTATION, 69 – METHODS OF PREVENTING FERMENTATION, 70	
CHAPTER 7. CARBOHYDRATES-OLIGOSACCHARIDES	73
DISSACCHARIDES, 73 – SUCROSE BIOSYNTHESIS, 77 – TRISACCHARIDES, 77 – SWEETNESS OF SUGARS, 78 – USE OF SUGARS IN THE FOOD INDUSTRY, 78	

CHAPTER 8. POLYSACCHARIDES	81
CLASSIFICATION, 81 – CELLULOSE, 82 – STARCHES, 83 – STARCH ENZYMES, 86 – MANUFACTURE OF STARCH, 89 – SYNTHETIC AND OTHER POLYSACCHARIDES, 90 – SUGAR ACIDS AND URONIDES, 90 – HEMICELLULOSES, 92	
CHAPTER 9. PECTIC SUBSTANCES	94
OCCURRENCE, 94 – STRUCTURE, 95 – PECTOLYTIC ENZYMES, 97 – PECTIN AS A JELLIFYING AGENT, 100 – THEORIES OF GEL FORMATION, 101 - COAGULATION AND CLOUD STABILITY, 103 – USE OF PECTINS IN FOOD, 105 – INDUSTRIAL MANUFACTURE OF PECTINS, 105 – PECTINS IN ALCOHOLIC FERMENTATION, 106	
CHAPTER 10. THE COLLOIDAL STATE	108
DISPERSED SYSTEMS, 108 – FOOD INDUSTRY'S USE OF COLLOIDS, 112 – SOLID DISPERSIONS, 114 – LIQUID – LIQUID EMULSIONS, 114 – FOAMS, 115 – OTHER COLLOIDAL SYSTEMS, 116 – THIXOTROPY, 117 – NON-DISPERSED SYSTEMS, 118	
CHAPTER 11. PROTEINS	119
OCCURRENCE, 119 – THE PEPTIDE BOND, 119 – AMINO ACIDS, 120 – INTRODUCTION OF NITROGEN, 123 – AMINATION AND TRANSAMINATION, 123 – CLASSIFICATION OF PROTEINS, 126 – PROPERTIES OF PROTEINS, 126 – MOLECULAR WEIGHTS, 128 – ELECTROPHORESIS, 129 – PROTEIN STRUCTURE, 131 – DENATURATION, 133 – PROTEOLYTIC ENZYMES, 135 – EXAMPLES OF SOME FOOD PROTEINS, 137 – CONJUGATED PROTEINS, 141 – THE STRUCTURE OF CHROMOSOMES, 145 – VIRUSES, 147	
CHAPTER 12. ENZYMES	151
DEFINITION, 151 – CLASSIFICATION 152, - THE PROSTHETIC GROUP, 154 – DEHYDROGENASES, 154 – THE PROTEIN-COENZYME BOND, 156 – DECARBOXYLASES, 159 – TRANSFERRING ENZYMES, 159 – SPECIFICITY OF ENZYMES, 161 – NON-PROTEINIC ENZYMES, 168 – INACTIVATION OF ENZYMES BY HEAT, 169 – USE OF ENZYMES IN THE FOOD INDUSTRY, 171	
CHAPTER 13. ENZYME KINETICS	177
THERMODYNAMICS, 176 – ACTIVATION ENERGY, 178 – INFLUENCE OF TEMPERATURE, 179 – THE ENZYME-SUBSTRATE COMPLEX, 180 – THE TURNOVER NUMBER, 180 – RATE OF ENZYMATIC REACTIONS, 181 – THE MICHAELIS EQUATION, 185	

CHAPTER 14. VITAMINS	187
HISTORY, 187 – VITAMIN A, 188 – THE VITAMIN B GROUP, 192 – VITAMIN B1, 192 – VITAMIN B2, 194 – PANTOTHENIC ACID, 195 – NICOTINIC ACID, 197 – VITAMIN B6, 199 - ρ -AMINOBENZOIC ACID, 200 – VITAMIN B12, 201 – INOSITOL AND BIOS I, 203 – BIOTIN, 204 – VITAMIN C, 205 – THE VITAMIN D GROUP, 211 – THE VITAMIN E GROUP, 213, - THE VITAMIN K GROUP, 215 – VITAMIN P, 217 – USE OF VITAMINS IN THE FOOD INDUSTRY, 217.	
CHAPTER 15. GLYCOSIDES-ANTHOCYANINS AND ANTHOXANTHINS	221
ANTHOCYANINS, 221 – ANTHOXANTHINS (FLAVONOIDS), 224 – BIOFLAVONOIDS, 229 – BITTER SUBSTANCES, 229 – TANNINS, 231.	
CHAPTER 16. LIPIDS	234
DEFINITION AND OCCURRENCE, 234 – FATTY ACIDS, 235 – ISOMERIZATION OF FATTY ACIDS, 236 – PROPERTIES, 237 – FATS AND OILS, 238 – BIOSYNTHESIS, 239 – MANUFACTURE OF EDIBLE OILS, 241 – HYDROGENATION OF “HARDENING OF OILS”, 241 – ENZYMATIC CLEAVAGE AND OXIDATION, 242 – ANTIOXIDANTS, 246 – WAXES, 247 – PHOSPHOLIPIDS, 248 - ENZYMATIC CLEAVAGE OF PHOSPHOLIPIDS, 250.	
CHAPTER 17. ESSENTIAL OILS	252
OCCURRENCE, 252 – STRUCTURE, 253 – BIOSYNTHESIS, 254 – MONOTERPENES, 257 – SESQUITERPENES, 259 – OXYGNATED TERPENES, 259 – STEAROPTENES, 262 – TRANSFORMATION OF TERPENES, 262 – TRANSFORMATION OF TERPENES, 262 – EXTRACTION OF ESSENTIAL OILS, 265 – TERPENELESS OILS, 265 – AROMA RECOVERY, 266.	
CHAPTER 18. PLANT ACIDS AND RESPIRATION	269
ALIPHATIC PLANT ACIDS, 269 – AROMATIC PLANT ACIDS, 270 – ACIDITY AND SOUR TASTE, 272 – PLANT RESPIRATION, 276 – THE TRICARBOXYLIC ACID OR KREBS’ CYCLE, 277 – ENZYMES OF THE RESPIRATION CYCLE, 280- THE PENTOSE OXIDATION CYCLE, 282.	
CHAPTER 19. BIOLOGICAL OXIDATION-ENZYMATIC BROWNING	286
TYPES OF OXIDATION, 286 – THE REDOX POTENTIAL, 289 – THE CLIMACTERIC CYCLE, 291 – THE RUPTURED PLANT TISSUE, 292 – ENZY-MATIC BROWNING, 294 – PROPERTIES OF OXIDATIVE ENZYMES, 296 – MECHANISM OF ENZYMATIC BROWNING, 298.	

CHAPTER 20. NON-ENZYMATIC BROWNING	302
THE MAILLARD REACTION, 302 – THE ASCORBIC ACID BROWNING MECHANISM, 304 – THE ACTIVE ALDEHYDE THEORY, 306 – THE HODGE SCHEME, 308 – RECENT THEORIES, 310 – METHODS FOR PREVENTING BROWNING, 311.	
Subject index	314
