

CONTENTS

1. Theological Properties of Foods	1
2. Reaction Kinetics in Food Systems	39
3. Phase Transitions and Transformations in Food Systems	145
4. Transport and Storage of Food Products	199
5. Heating and Cooling Processes for Foods	247
6. Food Freezing	277
7. Mass Transfer in Foods	317
8. Evaporation and freeze Concentration	341
9. Concentration of Liquid Foods by Reverse Osmosis	393
10. Food Dehydration	437
11. Thermal Process Calculations	563
12. Extrusion Processes	621
13. Food Packaging	667
14. Cleaning and Sanitation	719
Index	741
