

CONTENTS

Expression of the xylanase gene of <i>Bacillus pumilus</i> in <i>Escherichia coli</i> , <i>B. subtilis</i> and <i>Saccharomyces cerevisiae</i>	1
Chromosome engineering in <i>Saccharomyces cerevisiae</i> by using a site-specific recombinant system of a yeast plasmid	13
Molecular genetics of <i>Corynebacteria</i> : Cloning and characterization of the tryptophan operon and the genes of the threonine biosynthetic pathway	20
Cloning of the alkaline extracellular protease gene of <i>Yarrowia lipolytica</i> and its use to express foreign genes	27
Mitotic segregation in intergeneric hybrids of yeast to give novel genetic segregants	46
Genetic and technological improvements with respect to mass cultivation of microalgae	61
Biotechnology of enzymes and pigments	74
Hydration of nitriles to amides by microbial enzymes	88
Production of monoterpenes by yeast mutants defective in sterol biosynthesis	101
Drugs from the sea	123
Role of intestinal flora in health with special reference to dietary control of intestinal flora	135
Food regulations and food safety	149
Microbiological criteria in regulatory standards : reason or rhetoric	162
Safety assessment of genetic manipulation of microorganisms and plants, as applied to foods	177
<i>Salmonella</i> , the organism, its occurrence and prevention in foods	189
The application of DNA probes in food microbiology	219
Index of Contributors	232
