

Contents

Preface iii

Contributors vii

- Origin of Polysaccharide Supramolecular Assemblies 1
Reginald H. Walter
2. Polysaccharide Molecular Structures 15
David Oakenfull
- Gel Formation and Ultrastructure in Food Polysaccharides 37
Tokuya Harada and Akira Harada
4. Structures and Phase Transitions of Starch Polymers 57
Costas G. Biliaderis
5. Microcrystalline Cellulose Technology 169
*Gregory S. Buliga, George W. Ayling, Gregory R. Krawczyk,
and E. J. McGinley*
6. Cyclodextrins 207
Z. Helena Qi and Matthew L. Romberger
- 7 Starch–Lipid Interactions 227
Ratnajothi Hoover
8. Interactions in Whey Protein/Polysaccharide Mixtures at pH 7 257
P. B. Fernandes
9. Polysaccharide–Metal Interactions 273
Monique A. V. Axelos
10. Rheology of Structured Polysaccharide Food Systems: Starch
and Pectin 289
Paul E. Okechukwu and M. Anandha Rao

Index 329
