

CONTENTS

Session 1. Fundamentals: high moisture systems	1
Session 2. Fundamentals: low and intermediate moisture systems	65
Session 3. Physico-chemical and enzymatic changes	153
Session 4. Microbiology and water activity	229
Session 5. Technology: diffusion properties and non equilibrium states	331
Session 6. Technology: humectants and new intermediate moisture foods(IMF)	405
Session 7. Freezing and low temperature phenomena	497
Session 8. Commodities: properties of water and technology	573
Index	681
