

CONTENTS

Contributors	ix
Contents of Volume 2	xiii
Preface	xvii
Introduction: The Future of the Flavor Industry	1
Interactions of Flavor Compounds with Food Components	7
Interaction of Cyclodextrins with Taste Substances	19
Some Recent Aspects of the Chemistry of Naturally Occurring Pyrazines	35
The Chemical Bases of the Taste and Flavor Enhancing Properties Of Hydrolyzed Protein	
Molecular Approaches to Sweetness Quantitation	83
Flavour Potentiating Properties of Talin Sweetener (Thaumatococcus oculifera)	91
The Influence of Chemical Modification of the Sweet-Tasting Proteins Thaumatococcus and Monellin on the Sweetness Intensity and Character	113
Flavor Quality of Ginger Powders	119
Flavor Recovery from Mushroom Blanching Water	133
Prediction of the Organoleptic Quality of Beer	147
Phenols in the Aroma of Distilled Beverages	167
Flavor Constituents in Rum	183
Sensory and Instrumental Studies of Scotch Whisky Flavour	201
Some Advances in Alcoholic Beverages and Vinegar Flavor Research	225
The Wines in Cyprus: History, Culture, Technology, and Economics	241
Recent Data on the Biochemical Basis of Durum Wheat Quality	257

Changes in Quality Parameters of Flour Mill Streams, Produced from Soft Wheat after Hydrothermal Treatment	275
Quality of Wheat Gluten from Different Wheat Varieties and Manufacturing Methods	289
What Will an Increase in the Content of Fiber Mean to the Quality And Flavor of Bread, and How Will It Influence Breadmaking?	305
Production of High-Fructose Syrup from Cassava Starch	319
Flavor Profile of Queso blanco	327
Quality Contribution of Pigments to Fruits: The Vacuolar Contents of Grape Berry Subepidermal Tissues	341
Analysis and Flavor Effects of Volatile Sulfur compounds in Citrus Juices	361
Tannins in Solid Foods	377
Recent Advances in Cheese Flavor Research	389
Index	437
