

CONTENTS

Contributors	ix
Contents of Volume 1	xiii
Preface	xvii
Ingredients of Smoke and Smoke Flavor Preparations	1
Enzymatic Flavor Development in Foods	21
Wheat Flour Foods in Japanes Diet and Expectation on Wheat Quality	37
Organic Compounds, Inorganic Salts, and Processing Reactions as Means of Enhancing Fruit Flavors in Desserts	47
Practical Applications of New Forms of Dried Fruits	57
Quality Evaluation of Macadamia Nuts	71
Mechanised Plating for Viable Counts	83
Moisture Relations of Food Microorganisms	95
Pollution of Liquid Food by PVC Container	113
The Effect of Indole-3-Acetic Acid and Ca^{2+} on Triacontanol-Promoted Growth in <i>Zea mays</i>	127
Views on New Food Developments in Sweden	143
Novel Food Proteins: Views in Italy	153
Recent Advances in Shoyu Research	171
Development of a Flavor at IFF, Planning, Creation, and Commercialization	197
Advances in Legume Processing	211
Water and Lipid Interactions of Plant Additives as Related to the Quality of Foods and Beverages	221
Going from the Food and Beverage Analytical Laboratory to the Process Line	241

E Evaluation by Computer of Model Systems Application to the Reaction of Furfural with Hydrogen Sulfide and Ammonia	253
Changes in the Organoleptic Quality of Spices and Their Oleoresins In Stored Food Products	269
Flavoring of Extrusion Cooked and Textured Meat Extenders And Analogs	283
Determination of Cocoa Butter Substitutes in Chocolate	301
Application of HPLC for Evaluation of Coffee Flavor Quality	311
Carotenoids and Cell-Mediated Immune Responses	335
Certain Elements in Greek Wines	349
Integrators and Computers for the Laboratory. A Review from Experiences	363
The Role of Enology and viticulture in California Past, Present, and Future	369
Index	385
