CONTENTS

Preface vii

Section I. Introduction
1. The OXIDATIVE DETERIORATION OF FOOD LIPIDS 3

Section II. Mechanisms and Products of Lipid Oxidation
2. MECHANISMS 31
3. HYDROPEROXIDES 51
4. SECONDARY DEGRADATION PRODUCTS 79

Section III. Factors Affection Lipid Oxidation
5. METAL CATALYSIS 93
6. HEMATIN COMPOUNDS AND LIPOXIDASE AS BIOCATALYSTS 122
7. ANTIOXIDANTS 139
8. HIGH ENERGY IRRADIATION 151

Section IV. Autoxidation in Foods
9. MARINE PRODUCTS 173
10. DAIRY PRODUCTS 190
11. MEAT PRODUCTS 202
12. VEGETABLE OILS 215
13. DEHYDRATED FOODS AND MODEL SYSTEMS 230

Section V. Biological Significance of Autoxidized Lipids
14. ROLE OF ANTIOXIDANTS IN THE BIOLOGICAL FATE OF LIPIDS 255
15. BIOLOGICAL EFFECTS OF AUTOXIDIZED LIPIDS 269
16. TOXICITY OF HEATED FATS 294
17. NUTRITIONAL EFFECTS OF OXIDIZED AND THERMALLY POLYMERIZED FISH OILS 321
18. DIGESTION AND ABSORPTION OF AUTOXIDIZED LIPIDS 360

LIPIDS AND THEIR OXIDATION

19. VITAMIN E AND SELENIUM AS INHIBITORS IN In Vivo LIPID OXIDATION 367
20. LIPIDS AND ANTIOXIDANTS IN DIETARY NECROTIC LIVER DECENER-ATION 387
21. TRENDS IN THE NUTRITIONAL USE OF LIPIDS 409
22. SUMMARY OF SYMPOSIUM-PANEL DISCUSSION 418
