

CONTENTS

1. Introduction	1
2. Proteins	13
3. Plant Proteins	43
4. Processing of Oilseeds	67
5. Effect of Heat on Plant Proteins	79
6. Effect of Other Processing Factors on Vegetable Protein Meals	131
7. Evaluation of Protein Quality	153
8. Use of Processed in Mixed Feeds	191
9. Use of Processed Plant Proteins as Human Food	205
10. Vegetable Protein Isolates	249
11. Potential Uses of Isolated Oilseed Protein in Foodstuffs	277
12. Chemical Sources of Nitrogen as Supplements to Protein Feeds	291
13. Supplementation of Plant Proteins with Amino Acids	307
14. Soybean Oil Meal	353
15. Edible Isolated Soybean Protein	399
16. Groundnuts (Peanuts) and Groundnut Meal	419
17. Cottonseed Meal	469
18. Sesame Meal	535
19. Sunflower Seed Oil Meal	557
20. Rapeseed, Mustard-Seed, and Poppy-Seed Meals	577
21. Linseed Oil Meal	593
22. Minor Oilseed and Tree Nut Meals	619
23. Coconut Oil Meal	645
24. Palm Kernel Meal	677
25. Alfalfa and Other Leaf Meals	703
26. Peas and Beans	717
27. Fermentation Feedstuffs	739
28. Milling Feeds	761
29. Microbial Proteins	789
30. The Algae	805
31. Inedible Oilseed Meals	829
32. Plant Residues and Pomaces	859
33. Amino Acid Composition of Foodstuffs	878
