

TABLE OF CONTENTS

CHAPTER 1. WATER ACTIVITY	1
A. Introduction	1
B. Moisture Exchange Experiments	1
C. Definition of Chemical Potential and Water Activity	5
D. Food Properties which Influence Water Activity	7
E. Introduction to Moisture Sorption Isotherms	12
F. References	12
CHAPTER 2. MOISTURE SORPTION ISOTHERMSA	14
A. Introduction of General Moisture Sorption Versus Equilibrium Relative Humidity	14
B. States of the System	15
C. Specific Curves	19
D. Hysteresis	22
E. Temperature Effects	25
F. Total Pressure Effect	29
G. References	31
CHAPTER 3. DETERMINATION OF MOISTURE SORPTION ISOTHERMS	33
A. Controlling Water Activity (Relative Humidity)	33
B. Containers for Salt Solutions	39
C. Experimental Isotherm Procedure	40
D. Other Isotherm Method Problems	46
E. Controlled Atmosphere Microbalance	47
F. Measuring a_w Instead of Doing an Isotherm	48
G. Drawing the Isotherm	49
H. References	52
CHAPTER 4. USING MOISTURE SORPTION ISOTHERMS : FOOD STABILITY	57
A. Monolayer Stability Value	57

B.	Textural Modifications	63
C.	Microbiology	66
D.	References	68
CHAPTER 5. USING MOISTURE SORPTION ISOTHERMS : MOISTURE		
	TRANSFER	70
A.	Packaging Predictions	70
B.	Dry Ingredient Mixing	82
C.	Package Temperature Shift	96
D.	References	97
CHAPTER 6. USING MOISTURE SORPTION ISOTHERMS : HUMECTANT		
	SELECTION	99
A.	Introduction	99
B.	Raoult's Law Method	99
C.	Norrish Equation	100
D.	Grover Equation	104
E.	Ross Equation	107
F.	Example Problem	108
G.	Computerized Calculations	111
H.	Moisture Sorption Data	111
I.	References	118
APPENDIX A. RECOMMENDED BOOKS		119
APPENDIX B. DESCRIPTION OF COMPUTER PROGRAMS		121
A.	Water Analyzer Series	121
B.	MacIntosh Water Activity Software	121
C.	ERH CALE™	121
D.	Aw CALC	121
INDEX		122
