

## CONTENTS

### Plenary sessions:

Welcoming to SOS/70	1
The Challenge of the 70's: Produce and Conserve.	3
Political, Social, and Economic Aspects of the Food-Production Problem.	7
Famine at the Feast.	12
Food Science and Technology and the Developing Countries.	19
Nutrition Problem-Policies and Programme.	25
The 70's-Challenge and Change for Food Science.	30
Can Man Shape His Future? 1970 W.O. Atwater Memorial Lecture.	34
Words of Farewell.	45
Presidential Address, International Union of Food Science and Technology.	47

### Education for Food Science and Technology:

Vocational Training of Highly Qualified Specialists for Food Industry in the USSR.	51
Food Science and Technology in Europe, Canada and Africa.	54
Food Technology Education in Central America and Mexico.	63
Education of Food Technologists in Central America and Mexico.	74
Education of Food Technologists in Some Eastern European Countries.	85
Technical and Scientific Education at the Service of the Food Industries.	89
Situation of the Food Industry in South America and the Need for Technicians.	93
Can a Case be Made for Nutrition Education?	99

### Information and Documentation:

International Food Information Service.	105
Trends of Mechanized Documentation in Food Science and Nutrition in the Federal Republic of Germany.	111
Problems in Indexing Food Science and Technology Abstracts.	117
A Selective Dissemination (SDI) Program for Food Science and Technology.	123
A National Information and Documentation Center Serving the Food Industry.	131
Electronic Retrieval System for a Dairy Research Centre.	137
Problems in Japanese Periodicals on Food Science and Technology	146

### Food Acceptance in a Changing World:

Food Acceptance in a Changing World-Chairman's Remarks	151
Techniques for Industrialized Countries.	154
Cultural and Economic Factors Influencing Food Habit Patterns in Sub-Saharan Africa.	160

The Urbanization of Underdeveloped Countries, and its Effects on the Nutrition of Urban Populations	169
Role of Advertising and Promotion.	175
The Modern Bread Story.	178
Marketing Strategies in Developing Countries to Combat Infant Malnutrition.	182
<b>Nutritional Considerations in the Application of Food Technology:</b>	
Processing and Storage Damage to Nutritional Value of Foods.	189
Vitamin Fortification of Foods.	192
Mineral Fortification of Foods and Food Products.	200
Amino Acid Fortification of Foods.	208
Nutritional Specifications for Weaning Foods.	213
Vitamin Fortification and Nutrified Foods	127
Short Comment.	233
<b>New Sources of Proteins:</b>	
Opening Remarks.	234
Soybean Flours and Grits.	235
Textured Soy Proteins.	245
Potential of Cottonseed: Products, Composition and Use.	248
Rapeseed and Sunflower Protein.	262
Preparation, Characterization and Evaluation of Coconut Protein.	272
Limitations and Scope of Oilseed Proteins.	280
Fish Protein Conecntrate.	285
Leaf Protein.	290
Algal and Other Microbial Isolated Proteins.	299
High-Lysine Corn.	305
<b>Food Fat and Human Health:</b>	
Feeding Studies in Man.	310
Dietary Factors and Cardiovascular Diseases-Epidemiological Studies in Man.	314
Industrial Feasibility of Modifying Food Fat.	323
Factors Influencing Fat Consumption: Economic Implications for Agriculture and Industry.	
Comments.	327
<b>Biological Evaluation of the Nutritive Value of Foods:</b>	
Applicability of Animal Assays to Humans.	336
Metabolic Studies in Human Subjects.	344
Feeding Trials in Children.	358
Ethical Considerations in Feeding Studies on Children.	365

**Sensory Properties of Foods (Flavor):**

Classification and Genesis of Food Flavors.	368
Relationship of Chemical Structure to Odor and Taste.	379
Measurement of Relative Contribution of Constituents to Flavor Composition	395
The Creation of Flavor.	403
Relationship of Taste and Other Oral Functions to Food Acceptability.	409
Effect of Color on Food Acceptability.	415
The Relationship of Shear and Stress to Textural Properties of Food.	421
Relationships of Sounds and Other Vibrations to Food Acceptability.	437

**Food Engineering:**

Freezing Equipment Influence on Weight Losses.	446
Evaporation in the Florida Citrus Industry.	452
Fluidized Beds in Food Processing.	455
Applications of Membrane Ultrafiltration to Food Processing	462
Fundamentals and Optimization of Crushing Processes in Food Production	474
Novel Industrial Processes for Enzymic Conversion of Starch.	484
Freeze Concentration of Food Liquids.	491
Considerations for Food Product Development and Marketing in an Industrial Society.	499

**Food Preservation and Protection:**

Role of Food Science in the Development of developing countries.	505
Protecting Food From Deterioration During storage, Handling, and distribution in Technologically Less Developed Countries of the World.	518
Increasing Food by Reducing Waste.	532
Food Industry in Developing Countries.	538
Improved Food Production by Use of Crop-Protecting chemicals.	544
Advances in Food Processing – A Progress Report.	551
Impact of the Petroleum Industry on Protein Food Production.	561
Recent Developments in Food-Dehydration Technology.	565
Microwave Food Processing: A New Frontier.	575
Factors Affecting Quality Preservation in Frozen Foods.	580
Impact Of Plastics on Food Packaging and Preservation.	585
Recent Advances in Rigid Metal containers.	589
Food Irradiation: Progress, Problems and Prospects.	595

**Physical and Chemical Properties of Foods:**

Chemical and Physical Changes During Food Processing.	604
Some Thoughts on the Creation of Texture in Foods.	613
Properties of Water as Related to the Keeping Quality of Foods.	618

External Control of Maturation and Senescence of Fruits.	636
Contribution of Organic Chemistry to the Synthesis of New Foods and Food Components.	647
<b>Food Safety:</b>	
Ecology of Clostridium botulinum.	654
Factors Affecting the Growth of Clostridium perfringens.	661
Importance of Clostridium perfringens in Foods.	665
Food Poisoning Caused by Bacillus cereus.	669
Detection of Staphylococcus aureus and Its Food-Poisoning Toxins.	672
Properties of Purified Staphylococcal Enterotoxins.	676
Incidence of Salmonella with Special Reference to Europe.	681
Evaluation of the Salmonella Problem in the United States.	686
Vibrio parahaemolyticus Food Poisoning in Japan.	692
Viral Hepatitis Associated With Foods.	697
Importance of Aflatoxin in Foods With Reference to India.	701
Determination of Aflatoxins in Mixed Feeds.	705
Recent Progress in Research on Mycotoxins Other Than Aflatoxins.	712
Current Status of Paralytic Shellfish Poisoning.	717
Medical Significance of Antibiotic Usage in Food Production.	729
Safety in Use and Nutritional Value of Microbial Protein.	743
This Chemical World.	748
Permitted Pesticides: Validation of Their Safety.	753
Carcinogenic and Teratogenic Aspects of Saccharin.	764
Comparison of the Safety-in – Use of Natural and Synthetic Flavors.	771
Some Specific Problems Related to the Safety-in-Use of Flavors.	779
Toxicological Assessment of Food Colors.	784
Toxicological Assessment of Foodstuff Antioxidants.	793
Effects of Sulphur Dioxide in Animals and Man.	799
Safety of Irradiated Foods-Biological Aspects.	806
Problems of Investigating the Safety-in-Use of Food Packaging.	816
Polycyclic Aromatic Hydrocarbons in Heat-Treated Foods-Pyrolysis of Some Lipids, Beta-Carotene, and Cholesterol.	820
Closing Remarks.	830
<b>Food Laws and Regulations:</b>	
The Cultural and Social Foundations of Food Laws.	832
Nutritional and Safety Aspects of Food Laws.	835
Food Laws and Their Influence on International Trade.	845
Food Standards for the World(Codex Alimentarius).	849
Problems in the Administration and Enforcement of Food Laws.	868

The Impact of Laws and Regulations on Food Research and Technology.	874
<b>Water Supply and Water Disposal:</b>	
Opening Remarks.	879
Importance of Water Quality in Food Processing.	880
Agricultural Waste Management.	890
Vegetable Canning-Process Wastes.	895
Pollution-Abatement Control in Fruit and Vegetable Canning.	904
Economic Treatment of Dairy Waste.	908
The Re-Use of Waste Waters in Food Production.	911
SOS/70 Program	926
Additional Volunteer Pagors	941
Inaugural Ceremonies of the International Union of Food Science and Technology	945
Author and Subject Index	948
