

CONTENTS

	Page
SECTION I	
Oilseeds and Nuts, Cakes and Meals and Animal Feeding Stuff	
The Drawing and Handling of Samples	3
Preparation of the Samples for Analysis	14
Foreign Matter	15
Water and other Volatile Matter	17
The Benzine Content of Extraction Meal	17
Oil of Fat Content	20
Free Fatty Acid	30
Nitrogen and Protein by Kjeldahl	30
Determination of the Urease Activity in Soyabean Meal (N)	34
Soluble Protein in Extracted Meal (N)	36
Crude Fibre (N)	37
SECTION II	
Oils, Fats, Fatty Acids, and Fatty Alcohols	
Group 1	
Drawing and Handling of Oil and Fat Samples	
International Association of Seed Crushers – Recommended Standard Procedure for Sampling of Vegetable oils and fats – 30 th April 1962	44
Group 2	
Purity and Other Quality Characteristics	
Explanatory Note	58
Water and Other Volatile Matter	58
Water by Karl Fischer Method	59
Water by the Distillation Method	59
Determination of Water-insoluble Solvent	62
Impurities	62
Ash	64
Mucilage (N)	65
“Foots” in Linseed Oil (N)	65
Colour	67
Odour	74
Colour of Soap	75
Determination of Fuel Oil in Whale Oil and Fish Oils by Thin-layer Chromatography	78
Group 3	
Physical Characteristics	
Weight by Volume for Tank-weight Calculations	80
Consistency (Solidity)	88
Slip Point	88
Dilatation	91
Titre of Fatty Acids	96
Refractive Index	99
Viscosity	101
Flash Point	106

Group 4
Chemical Characteristics

Preparation of the Water-insoluble Fatty Acids	107
Iodine Value	109
Acid Value (Free Fatty Acid Content), Saponification Value, and Ester Value	113
Hydroxyl Value (Acetyl Value)	120
Unsaponifiable Matter	123
Oxidized Fatty Acids	126
Peroxide Value	129
Chlorophyll (N)	130
Paper Chromatographic Analysis of the Fatty acid Composition of Oils and Fats	131
Phosphatides-Lecithin	137
Polybromide Reaction	147
Thiocyanogen Value	149
Liquid and Solid Fatty Acids	149
Linoleic and Linolenic Acid conten	150
Detection of Vegetable Oils in Animal Fats	156
Trace Elements	159
Volatile Fatty Acids – Reichert-Meissl, Polenske, and Kirschner Value	164
Antioxidants in Oils and Fats	170
Mackey Test	179
Hydrocarbons in Fatty Alcohols	182
Specific tests for Identification and Purity of Oils and Fats	184

SECTION III

Glycerol

Free glycerol in Oils and Fats	193
Combined Glycerol in Oils and Fats	193
Crude and Refined Glycerol	196
Monoglyceride	208
Mono-, Di- and Triglycerides	215

SECTION IV

Analyses in Connection with the Extraction, Refining, Bleaching,
Hardening, and Other Processing of Oils and Fats

Extraction Benzine – Boiling Point Analysis	221
Extraction Benzine – Benzene Content	225
Determination of Soap in Neutralized Oils and in Acid Oils	231
Neutral Oil in Oils and Fats and in Acid Oils	233
Evaluation of Bleaching Earth for Moisture and Oil	235
Testing of Spent Bleaching Earth for Moisture and Oil	238
Hydrogenation of Oils and Fats	240
Degree of Splitting	257
Mineral Acid in Split Fats	258

SECTION V

Fat Products

Sampling and Preparation of Sample	263
Water	263
Fat and Non-fat	265
Free Fatty Acid	266
Sodium Chloride	268
Milk Solids	268
pH Value	268
Vitamin A	269
Carotene	276
Detection of Colouring Matter	278
Peroxide Value	280
Benzoic and / or Sorbic Acid	280

Penetration Value	281
-------------------	-----

SECTION VI

Specialist Methods and Techniques

The Control and Assessment of Variability in Routine Analysis	289
Time-saving Practices and Equipment in Factory Laboratories	295
The Analysis of Fatty Acids by Gas-Liquid Chromatography	305
Thin-layer Chromatography of Fats	315
Automation in the Analysis of Animal Feedstuffs with Special Reference to Amino Acid Analysis	319
Quality Assessment of Raw Materials for their Suitability for Refining Bleaching, and Deodorizing	328
Survey of Accelerated Tests for Determining the Stability of Oils and Fats	340
The Direct Determination of Trace Metals in Glyceride Oils by Spectrophotometric Methods	346
A Review of Methods for the Determination of Trace Metals in Oils and Fats and the Development Of a Direct Polarographic Method	352
Detection of Animal Fats in Vegetable Oils and Fats	357
Estimation of the Contents of Butter Fat, Coconut Oil, and Palm Kernel Oil in Fat Mixtures, Deduced from the Reichert-Meissel, Polenske, and Kirschner Values	362
Methods for Classifying and Identifying Fatty Materials and the Fatty Matter Contained in Products	366
Mass Spectrometry; its Value in the Identification of Fatty Acids	376
Infra-red Quantitative Analysis of <i>trans</i> Content in Fatty Acids and Derivatives	388
The Application of Nuclear Magnetic Resonance Spectroscopy to Fat Analysis	392

SECTION VII

The Analytical Characteristics and Fatty Acid Composition of the More Common Oils and Fats

	401
Author Index	409
Subject Index	413
