

## CONTENTS

Page

### SECTION I : OLEAGINOUS SEEDS AND FRUITS

- I.A. General Notes
  - I.A.1. Recommendation
  - I.A.2. Separation and determination of the impurities
  - I.A.3. Grinding
- I.B. Analysis of the Seed
  - I.B.1. Determination of moisture
  - I.B.2. Determination of Oil
- I.C. Analysis of the Oil Extracted from the Seed
  - I.C.1. Acidity

### SECTION II : OILS AND FATS

- II.A. General Notes
  - II.A.1. Preparation of the sample
  - II.A.2. Preparation of the insoluble fatty acids
- II.B. Determination of the Physical Constants
  - II.B.2. Refractive index
  - II.B.3. Determination of titre
  - II.B.4. Spectrophotometric determination of the colour of oils and fats
- II.C. Determination of Foreign substances
  - II.C.1. Moisture and volatile matter
  - II.C.2. Impurities
  - II.C.3. Ash content
  - II.C.4. Determination of monoglycerides
  - II.C.5. Determination of small quantities of water (modified Karl Fischer method)
  - II.C.6. Determination of the Phosphoric acid test (PAT) value of raw graphy
  - II.C.7. Determination of mono-, di- and triglycerides by column chromatography
- II.D. Determination of Chemical Characteristics
  - II.D.1. Acidity – Acid value ( $I_A$ )
  - II.D.2. Saponification value ( $I_S$ )
  - II.D.3. Ester value ( $I_E$ )
  - II.D.4. Determination of the neutral fat in highly acid fats
  - II.D.5. Determination of the unsaponifiable matter
  - II.D.6. Sterols
  - II.D.7. Iodine value ( $I_I$ )
  - II.D.8. thiocyanogen value ( $I_{SCN}$ )
  - II.D.9. Determination of soluble and insoluble volatile acids
  - II.D.10. Determination of the *A* and *B* numbers
  - II.D.11. Polybromide value
  - II.D.12. Oxidized acids
  - II.D.13. Peroxide value
  - II.D.14. Hydroxyl value
  - II.D.15. Indice de benzidine
  - II.D.16. Dosage du phosphore dans les huiles et graisses
  - II.D.17. Dosage des acides gras di- et tri-insatures par spectrophotometrie u.v.
  - II.D.20. Dosage de l'oxygene du groupe epoxy

### SECTION III : GLYCERINES

- III.A.1. Dosage du glycerol
- III.A.2. Dosage de l'arsenic dans le glycerol (methode photometrique au diethyldithiocarbamate d'argent)
- III.A.3. Dosage de l'eau dans le glycerol (methode de marl Fischer)
- III.A.4. Dosage des cendres dans le glycerol brut
- III.A.5. Dosage de l'alcalinite ou de l'acidite du glycerol brut
- III.A.6. Calcul du MONG dans le glycerol brut

### SECTION IV : SAVONS

- IV.A.2. Humidite
  - IV.A.3. Substances etrangeres insolubles dans le'ethanol
  - IV.A.4. Acides gras totaux bruts
  - IV.A.5. Alkali total
  - IV.A.6. Alkali libre total
  - IV.A.7. Alkali caustique libre
  - IV.A.8. Chlorures
  - IV.A.9. Resine
  - IV.A.10. Dosage du glycerol dans les savons
  - IV.A.11. Dosage de l'insaponifie – insaponifiable dans les savons
  - IV.A.12. Dosage de faibles teneurs en glycerol dans savons (methode photometrique)
- 
- II.D.15. Benzidine value
  - II.D.16. Determination of phosphorus in oils and fats
  - II.D.17. Determination of di- and tri-unsaturated fatty acids by u.v. spectrophotometry
  - II.D.20. Determination of epoxy-group oxygen

### SECTION III : GLYCERINES

- III.A.1. Determination of glycering
- III.A.2. Determination of arsenic in glycering (photometric method with silver diethyldithiocarbamate)
- III.A.3. Determination of water in glycerine (Karl Fischer method)
- III.A.4. Determination of ash in crude glycerine
- III.A.5. Determination of alkalinity or acidity of crude glycerine
- III.A.6. Calculation of MONG in crude glycerine

### SECTION IV : SOAPS

- IV.A.2. Moisture
- IV.A.3. Foreign matter insoluble in ethanol
- IV.A.4. Total crude fatty acids
- IV.A.5. Total alkali
- IV.A.6. Total free alkali
- IV.A.7. Free caustic alkali
- IV.A.8. Chlorides
- IV.A.9. Rosin
- IV.A.10. Determination of glycerol in soaps
- IV.A.11. Determination of the unsaponified and unsaponifiable matter in soaps
- IV.A.12. Determination of small quantities of glycerol in soaps (photometric method)
