

## CONTENTS

	Page
<b>PART 1 : COMPOUNDED WAXES</b>	
1. General	3
Compatibility	4
Hardness	14
Melting Point	15
Penetration	28
Refractive Index	30
Solubility in Oil	35
Viscosity	35
2. Paraffin Wax Compounds	42
3. Ethyl Cellulose and Wax Mixtures	58
Compounding Ethyl Cellulose with Incompatible Substances	58
Methods of Preparing Mixtures of Waxes with Ethyl Cellulose	63
4. Compositions with Resins and Rubber	70
Resin-Wax Compositions	70
Compatibility of Varnish Resins with Waxes	71
Cumarone-Indene Resins and wax Compositions	72
Methacrylate Resin Hot-Melt Blends	76
Microcrystalline Wax-Resin Blends	81
Wax-Rubber Compositions	91
5. Commercial Wax Additives	97
<b>PART 2 : WAX TECHNOLOGY</b>	
6. Tests and Techniques	127
The Melting Points of Waxes	127
Odor and Taste	133
Emulsions	134
Fluorescence of Waxes	137
Solubility of Waxes	141
Commercial Wax Solutions	150
Surface Tension of Waxes	156
Specific Gravity	156
Specific Heat of Petroleum Waxes	158
To Alter Properties of Paraffin Wax	160
Simple Tests	165
Identification of Mixed Waxes	166
Separation and Comparison of Properties	170
Detecting Wax Additives	177
Evaluation of Waxes for Paperboard	183
Determinations of Properties	191
Testing for Quality Control	192
Opacifying Waxes	196
Coloring Waxes	197
7. Industrial Uses of Waxes	201
Adhesives	201
Candles	203

Coatings	208
Cosmetics	220
Electrical Applications	225
Inks	228
Leather Goods	234
Paper Products	238
Pharmaceutical Preparations	259
Photomechanics	263
Plastics	266
Polishes	267
Pyrotechnics	273
Rubber	274
Textile Processing	274
Abbreviations	279
Alphabetic Listing of Trademark Products	281
Index	285
