CHAPTER	PAGE
PREFACE TO THE SECOND EDITION	3
PREFACE TO THE FIRST EDITION	4
INTRODUCTION	9
ABBREVIATIONS	13
1. NATURAL WAXES	17
<i>Mineral Waxes:</i> Paraffin Wax—Microcrystalline Waxes—Petrolatum Wax—Ozokerite—Ceresin—Utah Wax—Montan Wax. <i>Vegetable Waxes:</i> Botanical Origin of Waxes—Solubility of Vegetable Waxes—Carnauba Wax—Flower Wax—First Wax—Medium Wax—Sandy Wax—Fat Wax—Candelilla Wax—Japan Wax—Ucuhuba Wax—Bayberry Wax—Ouricury Wax—Cocoa Butter—Fiber Wax—Fir-Bark Wax—Cotton Wax—Flax Wax—Sugar-Cane Wax—Rice-Oil Wax. <i>Animal Waxes:</i> Spermaceti. <i>Insect Waxes:</i> Beeswax.	
2. MANUFACTURED AND SYNTHETIC WAXES	135
<i>Fatty Alcohols:</i> Cetyl Alcohol—Lanette Wax—Technical Stearyl Alcohol. <i>Fatty Acids:</i> Stearic Acid—Palmitic Acid—Myristic Acid—Distilled Fatty Acids—Solubility of Fatty Acids. <i>Polyglycols:</i> Carbowaxes. <i>Polyhydric Alcohol Fatty Acid Esters:</i> Glyceryl Stearates—Glycol Fatty-Acid Esters—Sorbitol Stearates—Pentawaxes. <i>Hydrogenated Oils:</i> Opalwax. <i>Chlorinated Naphthalenes:</i> Halowax—Seekay Wax. <i>Acrawaxes:</i> Acrawax B—Acrawax C. <i>I. G. Waxes.</i> <i>Miscellaneous Synthetic Waxes:</i>	

Albacer—Diolin—Flexo Wax C—Glyco Waxes—Stroba Wax. *Ketones, Amines, Amides, and Nitriles*: 16-Hentriacontanone—Octadecyl-Hexadecyl Amine—Octadecylamine—Armids—Octadecanamide-Hexadecanamide—Octadecane Nitrile—Octadecane-Hexadecane Nitrile. *Santowaxes*: Santowax R. *Alcowaes*: Alcowax-M—Alcowax-G.

3. PHYSICAL PROPERTIES OF WAXES AND WAX COMPOSITIONS 190

Increasing the Viscosity of Molten Waxes. Penetration. Surface Tension of Waxes. Adhesiveness. Increasing Compatibility. Raising the Melting Point of Waxes: Raising the Melting Point of Petrolatum. Effects of a Wax Sizing on the Moisture Absorption of Insulating Board. Pliolite-Paraffin Wax Compositions. Specific Heat of Petroleum Waxes. Melting Points of Binary Wax Mixtures. Solubility of Waxes: Solubility of Waxes in Different Solvents. Compatibility of Paraffin Waxes with Other Substances. Compatibility of Mixed Fatty Acids. Compounded Waxes. Wax-Rosin Compositions. Cumar and Wax Compositions. Compatibility of Varnish Resins with Waxes. Resin-Wax Combinations. Methacrylate Resin Hot-Melt Blends. Methods of Preparing Mixtures of Waxes with Ethyl Cellulose: Use of Incompatible Substances—Compounding Ethyl Cellulose with Incompatible Substances. Melting Point and Congealing Point of Various Waxes. Melting Points of Binary and Ternary Wax Mixtures. The Effect of Composition on the Specific Gravity of Binary Wax Mixtures.

4. WAX TECHNOLOGY 283

Adulteration. Quality Variations. Simple Tests: Melting Point—Specific Gravity—Moisture and Insoluble Matter. Accurate Determination of Specific Gravity: Preparation of Sample—Determination of Specific Gravity at 25/25°C. Identification of Mixed Waxes: Schematic Outline for Identification—Separation and Comparison of the Properties of the Wax Components—Spermaceti—Beeswax—Carnauba Wax—Candelilla Wax—Montan Wax—Paraffin Wax—Ozokerite—Rosin—Stearic Acid—Cetyl Alcohol. Ratio Numbers of Waxes. Detecting Wax Additives. Odor and Taste. The Melting of Waxes. Com-

mercial Wax Solutions: Solvents for Waxes or Waxlike Substances—Solvent-Wax Compositions—Solvent Retention of Waxes—Faulty Solvent-Wax Compositions—Filling Containers with Wax Composition—United States Government Specifications for Solvent-Wax Compositions. *Coloring Waxes. Emulsions*: Formulation—Methods of Emulsification.

5. WAXES IN INDUSTRY

322

Dental Waxes: Method of Producing Base-Plate Wax. *Lipsticks. Pharmaceutical Preparations. Embalming Preparations. Pyrotechnics. Candles*: Wicks—Winding—Candle Sizes—Machinery—Wax Candles—Paraffin Candles—Temperature Control—Colors, Sizes, and Shapes—Standard Candle—Melting Point of Wax Mixtures—Congealing Point of Candles. *Leather Finishes. Paper Finishes. Waterproofing Kraft Papers. Evaluation of Waxes for Paper Board*: Stain and Flow Test at 130°F.—Softening and Melting Point—Flexibility and Strength—Viscosity—Surface Tension—Permeability—Degree of Impregnation—Effect of Wax on the Strength of Board—Electrolyte Penetration Test—Water Absorption. *Adhesives. Foil Coatings. Paraffin Wax-Polyethylene Packaging. Waxed Paper. Hot-Melt Coatings. Tropical Waxed Paper*: Physical Properties of the Wax—Properties of Blend. *Nonsticking Coatings. Textile Processing*: Sizing—Printing—Finishing—Yarn Finishes—Waterproofing. *Textile Applications of Synthetic Waxes. Textile Printing. Protective and Decorative Coatings. Antidim Coatings*: Antidim Coating Formulation. *Rubber. Plastic Molding. Electroplating. Electrolytic Condensers. Wax Coatings for Fruits, Shrubs and Plants. Photomechanics. Polishes. Floor Polishes. Saponified Shoe Cream*: Manufacture of Saponified Creams. *Rubless Emulsion Polishes. Printing Inks. Fluorescence of Waxes. Coloring Waxes. Carbon-Paper Ink Compositions*: Effect of Various Percentages of Paraffin Wax on Esparto-Montan Mixtures. *Stencils. Carbon-Paper Inks*: Solubility of Common Waxes Used—Wetting Qualities of Natural Waxes.

6. GLOSSARY, SPECIAL TABLES, AND SUBSTITUTES

454

7. WAX FORMULARY

477

Adhesives and Cements. Agricultural and Garden Specialties. Building Materials. Carbon Paper, Inks, and Crayons. Cosmetics and Medicinal Preparations. Dental Preparations. Emulsions. Food Products. Leather and Furs. Metal Treatment. Miscellaneous. Paper. Photography. Polishes and Abrasives. Protective and Decorative Coatings. Soaps and Cleaners. Textile Compounds. Waterproofing.
