

CONTENTS

	Page
1. HYDROGENATION	1
Introduction	1
Chemistry of Hydrogenation	4
Effects of Process Conditions	14
Effects of Substrate	22
Hydrogenation in practice	27
Theory of Catalysis	52
Hydrogen Production and Purification	69
Aids for Hydrogenation Calculations	90
2. FAT SPLITTING, ESTERIFICATION, AND INTERESTERIFICATION	97
Fat Splitting	99
Esterification	113
Interesterification	127
3. EXTRACTION OF FATS AND OILS	175
Mechanical Pretreatment	178
Heat Treatment of Oil-Bearing Materials	187
Mechanical Expression of Oil	201
Solvent Extraction	215
Recovery of Oil from Fruit Pulps	245
4. REFINING AND BLEACHING	253
General Considerations	254
Desliming or Degumming	264
Alkali Redining	268
Treatment and Disposal of Soapstock	290
Bleaching	292
5. COOKING OILS, SALAD OILS, AND SALAD DRESSINGS	315
Introduction	315
Natural and Processed Cooking and Salad Oils	316
Stability of Salad Oils and Cooking Oils	320
Quality Evaluation of Salad Oils and Cooking Oils	322
Additives for Salad and Cooking Oils	326
Nutrition-Oriented Salad and Cooking Oils	327
Quality Control and Stability Measurements	332
Manufacture	334
Spoonable and Pourable Salad Dressings	335
Low-Calorie Salad Dressings	336
Heat-Stable Dressings	337
6. MISCELLANEOUS OIL AND FAT PRODUCTS	343
Drying Oil Products	344
Lubricants and Plasticizers	355
Miscellaneous Nondrying Oil Products	371
Commercial Fatty Acids and Their Derivatives	378
Synthetic Fats and Fatty Acids	392
Fats in Feeds	399

7.	Analytical Methods	407
	Introduction	407
	Methods and Procedures	411
8.	ENVIRONMENTAL ASPECTS OF ANIMAL AND VEGETABLE OIL PROCESSING	527
	Introduction	527
	Water Pollution	528
	Air Emissions and Odor	570
	Waste Materials	580
	INDEX	587
