

CONTENTS

	Page	
I	INTRODUCTORY SURVEY OF THE NATURAL FATS	1
	Classification and nomenclature of natural derivatives of the higher fatty acids	2
	The component acids of natural fats	5
	The component glycerides of natural fats	15
II	THE COMPONENT ACIDS OF FATS OF AQUATIC FLORA AND FAUNA	25
	Fats of aquatic flora and micro-fauna	26
	Fats of larger aquatic invertebrates	30
	Fats of fish :	
	Marine Elasmobranch fish (liver fats)	33
	Marine Teleostid fish (liver fats)	37
	Marine Teleostid fish (body fats)	41
	Fresh-water fish	46
	Salmon	48
	Eel	51
	Sturgeon	53
	Tunny	54
	Groper	55
	South African marine fish	56
	Fats of marine mammalia :	
	Seal family	58
	Whale family	63
	Sperm whale family	65
	Dolphin and porpoise family	67
	Platypus	69
III	THE COMPONENT ACIDS OF FATS OF LAND ANIMALS	73
	Depot fats (glycerides) of land animals:	
	Invertebrata	74
	Insects	74
	Amphibia and reptiles	77
	Birds	79
	Bird eggs	82
	Rodents	85
	Herbivora	92
	Carnivora and Omnivora	114
	Animal depot fats (Summary)	116
	Lipids of animal organs :	
	Liver glycerides	119
	Liver phosphatides	121
	Other animal organs	122
	Ox blood lipids	123
	Milk fats :	
	Cow milk fats	125
	Milk fats of other animals	135
	Human milk fat	139
IV	THE COMPONENT ACIDS OF VEGETABLE FATS	146
	Cryptogam fats:	
	Bacteria	146
	Yeast, moulds and fungi	148

	Clubmoss	150
	Ferns	150
	Phanerogam fats :	
	Leaf fats	152
	Bark and stem fats	154
	Root fats	156
	Lipids of petals and stamens	156
	Short-chain unsaturated acids in flowers and leaves	157
	Fruit fats	159
V	THE COMPONENT GLYCERIDES OF NATURAL FATS : GENERAL SURVEY	275
	Easy attempts to isolate natural glycerides by crystallisation	276
	Isolation of chemically modified natural glycerides	278
	Modern quantitative studies	279
	Distribution of saturated, oleic, linoleic, linolenic and other acids in natural fats	297
	Present knowledge of glyceride structure of natural fats 304	
	Vegetable fats	306
	Anomalous features in certain vegetable fats	307
	Animal fats	309
	Milk fats	315
	Alternative views on glyceride structure of natural fats	322
	Computation of proportions of chief component glycerides from fatty acid composition	327
	Configuration of natural mixed triglycerides	332
	Optical rotatory power in natural fats	333
	Component acids of trisaturated glycerides present in vegetable fats	334
VI	THE COMPONENT GLYCERIDES OF INDIVIDUAL VEGETABLE FATS	342
	Seed fats of the palmæ	342
	Seed fats of the Lauraceæ and Myristicaceæ	344
	Seed fats containing 30-65 per cent. Saturated acids in their component acids	348
	Seed fats in which unsaturated acids predominate	263
	Fruit-coat fats	382
VII	THE COMPONENT GLYCERIDES OF INDIVIDUAL ANIMALS FATS	391
	Marine animal fats	391
	Cod liver oil	392
	Whale oil	393
	Herring oil, seal oils	396
	Sperm whale oils	399
	Porpoise fats	400
	Land crab, green turtle fats	401
	Land animal fats	402
VIII	SOME ASPECTS OF THE BIOSYNTHESIS OF FATS	436
	The biosynthesis of fats in plants	437
	The biosynthesis of fats in animals	437
	Marine animal fats	447
	Land animal fats	451
	Possible mechanisms of the conversion of carbohydrates into fats	461
	Assimilation of preformed fats by animals	472
	Digestibility of ingested fats	477
	Ingested fatty acids essential to health	478
IX	CONSTITUTION OF INDIVIDUAL NATURAL FATTY ACIDS	483
	Naturally occurring saturated fatty acids	483
	Naturally occurring unsaturated fatty acids	491
	Oleic acid	493
	isoOleic acids	502
	Synthesis of unsaturated fatty acids	503
	Monoethenoid acids $\text{CH}_3.[\text{CH}_2]_7. \text{CH}:\text{CH}.[\text{CH}_2]_n.\text{COOH}$	511
	Monoethenoid acids $\text{CH}_3.[\text{CH}_2]_m. \text{CH}:\text{CH}.[\text{CH}_2]_7.\text{COOH}$	513

	Hydroxy-unsaturated acids (including ricinoleic)	517
	Acids containing the structure = C(H). [CH ₂] ₄ .COOH	520
	Chaulmoogric, hydnocarpic, gorlic acids	521
	Other monoethenoid acids (including vaccenic)	523
	Polyethenoid acids	525
X	SYNTHETIC GLYCERIDES : INDIVIDUAL NATURALLY OCCURRING FATTY ALCOHOLS AND ACYL ETHERS OF GLYCEROL	551
	Synthetic glycerides	552
	Thermal and X-ray data	554
	Syntheses of optically active alcyerol derivatives	560
	Naturally occurring higher aliphatic alcohols	561
	Saturated alcohols (cetyl, etc.)	562
	Unsaturated alcohols (oleyl, etc.)	563
	Glycerol ethers (chimyl, batyl and selachyl alcohols)	565
XI	NOTES ON EXPERIMENTAL TECHNIQUE EMPLOYED IN THE QUANTITATIVE INVESTIGATION OF FATS	570
	Quantitative investigation of component fatty acids	571
	Preliminary separation of mixed fatty acids	573
	Ester-fractionation (in vacuo)	581
	Determination of certain polyethenoid acids by spectrophotometric methods	585
	Typical ester-fractionation data	586
	Calculation of ester-fractionation data	609
	Quantitative investigation of component glycerides	620
	Determination of fully-saturated glycerides	620
	Determination of tri-C ₁₈ glycerides by means of hydrogenation	621
	Preliminary resolution of fats by systematic crystallisation from solvents	622
	GENERAL INDEX OF SUBJECTS	635
	INDEX OF INDIVIDUAL FATS AND WAXES	645
	INDEX OF PLANT FAMILIES	657
	INDEX OF INDIVIDUAL FATTY ACIDS	659
	INDEX OF INDIVIDUAL GLYCERIDES	662
