

Contents

<i>Preface to the Second Edition</i>	iii
<i>Preface to the First Edition</i>	v
<i>Contributors</i>	ix

Part I: Naphtha Reforming Chemistry

1. Compositional Analysis of Naphtha and Reformate <i>Rune Prestvik, Kjell Moljord, Knut Grande, and Anders Holmen</i>	1
2. Basic Reactions of Reforming on Metal Catalysts <i>Zoltán Paál</i>	35
3. Chemistry of Bifunctional Metal–Acid Catalysis <i>José M. Parera and Nora S. Figoli</i>	75
4. Naphtha Hydrotreatment <i>Syed Ahmed Ali</i>	105

Part II: Reforming Catalysts

5. Preparation of Reforming Catalysts <i>J. R. Regalbuto and George J. Antos</i>	141
6. Characterization of Naphtha-Reforming Catalysts <i>Burtron H. Davis and George J. Antos</i>	199
7. Optimization of Catalyst Pore Structure by Kinetics and Diffusion Analysis <i>Jerzy Szczygieł</i>	275
8. The New Generation of Commercial Catalytic Naphtha-Reforming Catalysts <i>George J. Antos, Mark D. Moser, and Mark P. Lapinski</i>	335

9.	Naphtha Reforming Over Zeolite-Hybrid-Type Catalysts <i>Grigore Pop</i>	353
Part III: Catalyst Deactivation and Regeneration		
10.	Deactivation by Coking <i>Octavio Novaro, Cheng-Lie Li, and Jin-An Wang</i>	391
11.	Catalyst Regeneration and Continuous Reforming Issues <i>Patricia K. Doolin, David J. Zalewski, and Soni O. Oyekan</i>	433
12.	Precious Metals Recovery from Spent Reforming Catalysts <i>Horst Meyer and Matthias Grehl</i>	459
Part IV: Technology and Applications		
13.	Licensed Reforming Processes <i>Abdullah M. Aitani</i>	477
14.	Control Systems for Commercial Reformers <i>Lee Turpin</i>	497
15.	Modeling Catalytic Naphtha Reforming: Temperature Profile Selection and Benzene Reduction <i>Rafael Larraz and Raimundo Arvelo</i>	551
	<i>Index</i>	595
