

# Table of Contents

## Preface

## Author

<b>Chapter 1</b>	Introduction.....	1
1.1	Base Stocks: General.....	1
1.2	Base Stocks from Crudes.....	2
1.3	Base Stock Properties.....	6
1.4	Feedstocks and Base Stocks: General Compositional Aspects.....	12
1.5	API Base Stock Classifications.....	15
1.6	Viscosity Grades for Industrial Lubricants.....	16
1.7	Society for Automotive Engineers Viscosity Classification for Engine Oils.....	17
1.8	API Engine Oil Classifications.....	18
	References.....	19
<b>Chapter 2</b>	Viscosity, Pour Points, Boiling Points, and Chemical Structure.....	21
2.1	Viscosity.....	21
2.1.1	Introduction.....	21
2.1.2	Viscosity Units.....	21
2.1.2.1	Systematic Units.....	22
2.1.2.2	Empirical Units.....	23
2.1.3	Temperatures Used for Measurement.....	24
2.1.4	Hydrocarbon Viscosities and Composition.....	24
2.2	Pour Points and Chemical Structure.....	29
2.2.1	Introduction.....	29
2.2.2	Pour Points and Composition.....	31
2.3	Boiling Points and Structure.....	37
	References.....	41
<b>Chapter 3</b>	Development of the Viscosity Index Concept and Relationship to Hydrocarbon Composition.....	43
3.1	Viscosity Index.....	43
3.1.1	Background.....	43
3.1.2	Development of the Concept: Dean and Davis Work.....	43
3.1.3	Viscosity Index Issues: Reference Samples.....	48
3.1.4	Viscosity Index Issues: High VI Range.....	50
3.1.5	Viscosity Index Issues: Viscosity Effect.....	53

3.1.6	Alternative Proposals to the Viscosity Index .....	57
3.1.7	Viscosity Calculation: The Walther Equation—ASTM D341 .....	57
3.2	Viscosity Index and Composition .....	58
3.2.1	Paraffins and Related Molecules .....	58
3.2.2	Polycyclic Molecules .....	61
3.2.3	Viscosity Index Distributions in Base Stocks: Use of Thermal Diffusion .....	63
References	.....	71
<b>Chapter 4</b>	<b>Compositional Methods .....</b>	<b>75</b>
4.1	Introduction .....	75
4.2	n-d-M Method .....	76
4.3	Density and Viscosity Relationships: The VGC .....	79
4.4	Refractive Index and Density: Refractivity Intercept .....	82
4.5	Refractive Index and Reciprocal of Carbon Number .....	85
4.6	n-d-M Method: Development .....	87
4.7	NMR Spectroscopy: Background .....	88
4.8	<sup>1</sup> H and <sup>13</sup> C Applications .....	89
4.9	Wax Analyses .....	90
4.10	Some <sup>13</sup> C NMR Applications .....	93
References	.....	97
<b>Chapter 5</b>	<b>Oxidation Resistance of Base Stocks .....</b>	<b>99</b>
5.1	Introduction .....	99
5.2	Studies on Solvent Refined Base Stocks .....	102
5.3	Impact of Aromatics and Sulfur Levels .....	111
5.4	Lubricant Performance, Composition, and the Trend to Hydrocracked Base Stocks .....	123
References	.....	136
<b>Chapter 6</b>	<b>Conventional Base Stock Production: Solvent Refining, Solvent Dewaxing, and Finishing .....</b>	<b>141</b>
6.1	Solvent Refining .....	141
6.2	Solvent Dewaxing .....	148
6.3	Finishing Solvent Refining Lube Base Stocks .....	154
6.3.1	Clay Treating .....	154
6.3.2	Hydrofinishing .....	156
References	.....	168
<b>Chapter 7</b>	<b>Lubes Hydrocracking .....</b>	<b>171</b>
7.1	Introduction .....	171
7.2	Group II Base Stock Production .....	172

7.2.1	IFP Technology: Empress Nacional Calco Sotelo Refinery in Puertollano, Spain .....	172
7.2.2	Gulf Technology: Sun's Yabacoa, Puerto Rico, Plant .....	180
7.2.3	Shell's Hydroprocessed Lubes .....	184
7.2.4	Gulf Technology: Petro-Canada's Mississauga Refinery, Canada.....	188
7.2.5	Chevron's Hydrocracking Technology for Its Richmond, California, Refinery .....	194
7.2.6	ExxonMobil Technologies.....	200
7.3	Group III Base Stocks.....	205
7.3.1	Background.....	205
7.3.2	Shell.....	208
7.3.3	British Petroleum.....	208
7.3.4	Nippon Oil.....	209
7.3.5	Mitsubishi.....	210
7.3.6	The Korean Group III Giants.....	214
	7.3.6.1 SK Corporation (Formerly Yukon Limited) .....	216
	7.3.6.2 S-Oil (Formerly Ssangyong).....	219
	References .....	219
<b>Chapter 8 Chemistry of Hydroprocessing .....</b>		<b>223</b>
8.1	Introduction.....	223
8.2	Hydrodearomatization (HDA).....	223
8.3	HDA: Kinetic Aspects .....	226
8.4	HDA: Equilibria .....	234
8.5	HDA: Polycyclic Aromatic Hydrocarbon Formation .....	242
8.6	Hydrodesulfurization .....	245
8.7	Hydrodenitrification.....	250
8.8	Hydrocracking .....	253
8.9	Process Modeling .....	258
	References .....	259
<b>Chapter 9 Urea Dewaxing and the BP Catalytic Process.....</b>		<b>265</b>
9.1	Introduction.....	265
9.2	Wax Composition and Properties.....	266
9.3	Urea Dewaxing .....	271
9.4	Urea Dewaxing: Commercial Applications .....	279
9.5	The BP Catalytic Dewaxing Process .....	282
	References .....	289
<b>Chapter 10 Dewaxing by Hydrocracking and Hydroisomerization .....</b>		<b>293</b>
10.1	Dewaxing by Hydrocracking .....	293
	10.1.1 Introduction.....	293
	10.1.2 Mobil Lube Dewaxing by Hydrocracking .....	293

10.1.3	The MLDW Process: Commercial Experience.....	302
10.1.4	Chevron Dewaxing by Hydrocracking.....	306
10.1.5	Further Studies.....	310
10.2	Dewaxing by Hydroisomerization.....	312
10.2.1	Introduction.....	312
10.2.2	Commercial Dewaxing by Hydroisomerization.....	313
10.2.3	Pour Points, VI, and Paraffin Structure.....	317
10.2.4	Hydroisomerization: Model Compound Studies.....	321
10.2.5	ExxonMobil MWI Process.....	327
	References.....	331

**Chapter 11** Technical and Food Grade White Oils and Highly Refined Paraffins ..... 335

11.1	White Oils.....	335
11.1.1	Introduction.....	335
11.1.2	Manufacture by Acid Treatment.....	337
11.1.3	Hydrotreatment Processes.....	337
11.1.3.1	Introduction.....	337
11.1.3.2	First-Stage Operation.....	340
11.1.3.3	Second-Stage Operation.....	340
11.1.3.4	Products.....	341
11.1.3.5	Product Specifications for Polynuclear Aromatics.....	345
11.2	Refined Waxes.....	348
	References.....	352

**Chapter 12** Base Stocks from Fischer-Tropsch Wax and the Gas to Liquids Process ..... 355

12.1	The Fischer-Tropsch Process.....	355
12.2	Product Distributions.....	357
12.3	Base Stock Properties.....	358
12.4	GTL Processes.....	360
12.5	<sup>13</sup> C Nuclear Magnetic Resonance Applications to Fischer-Tropsch Base Stocks.....	362
	References.....	366

**Index** ..... 367
