

## CONTENTS

	Page
Purpose of Manual	1
Introduction	1
Nature of Short Analysis – Need for Cross-Check Methods	1
Nomenclature	1
Composition of Petroleum and Available Methods	11
Precision of Methods	13
References for Introduction	14
<b>PART I DISCUSSION OF ANALYSIS BY PRODUCT TYPES</b>	
Chapter I Gas Analysis ; Analysis of C <sub>5</sub> and Lighter Hydrocarbons	19
Background Information on Gas Analysis	19
Present Recommendations for Gas Analysis	21
References on Gas Analysis	23
Chapter II Analysis of Gasoline and Other Distillate Fuels	25
Background Information Analysis	25
Present Recommendations for Analysis of Gasoline and Similar Wide-Boiling Naphthas	27
Present Recommendations for Analysis of Narrow Cuts and Pure Compounds in Gasoline	29
Boiling Range	29
Specific Comments on Analysis of Solvents	31
Specific Comments on Analysis of Kerosine , Light Fuel Oil, and Jet Fuels	31
Analysis of Gas Oil and Diesel Fuels	32
Bibliography on Analysis of Gasoline, Other Distillate Fuels, and Solvents	32
Chapter III Analysis of Viscous Oils	35
Molecular Composition of Viscous Fractions of Petroleum and Related Definitions	35
Molecular- Type Analysis	36
Carbon – Type Analysis	37
Analysis and Classification of Rubber Process and Extender Oils	38
Bibliography on Analysis of Viscous Oils	39
<b>PART II ASTM METHODS OF TEST</b>	
Physical Properties Determinations	
Density	
Gas Density <sup>1</sup> (D 1070-52)	45
Light Oils (D 941 – 55 and D 1217 – 54) (Pycnometer Methods)	76, 82
Heavy Oils and Melted Solids (D 1480 – 62 and D 1481 – 62) (Pycnometer Methods)	89, 97
API Gravity (D 287 – 55); Specific Gravity (D 1298 – 55) (Hydrometer Methods)	105, 109
Specific Gravity of light Hydrocarbons (D 1657 – 59 T) (Pressure Hydrometer Method)	113
Density of Knock Test Normal Heptane and Isooctane by Pycnometer (Proposed) Method	116
Refractive Index and Dispersion	
Bausch & Lomb Refractometer Method (D 1218 – 61)	122
(Abbe Refractometer Method) (Part of ES – 45a)	128
Refractive Index at 80 to 100 C (D 1747 – 62)	131
Refractive Index and Specific Dispersion Method (D 1807 – 62 T)	136
Freezing Point of Hydrocarbons	
Determination of Freezing Point (D 1015 – 55)	139
Calculation of Purity from Freezing Point (D 1016 – 55)	154
Solidification Point Benzene (D 852 – 60)	174
Solidification Point of Aromatic Hydrocarbons (D 1493 – 58 T)	176

Melting Point Wax (D 87 – 57 and D 127 – 60)	181, 184
Solvency Tests	
Aniline Point (D 611 – 55T and D 1012 – 62)	186, 192
Kauri Butanol (D 1133 – 61)	196
Heptane Number (D 1132 – 53)	199
Nitrocellulose Diluting Power (D 1134 – 53) <sup>2</sup>	201
Viscosity Reduction (D 1311 – 61)	204
Viscosity	
Kinematic (D 445 – 61)	207
Conversion of Kinematic to Saybolt (D 446 – 53)	255
Method of Calculation of Absolute Viscosity (D 1745 – 60 T)	258
Chemical Analysis	
Chemical Methods for Gas Analysis	
Natural Gas, C <sub>1</sub> and C <sub>2</sub> (D 1136 – 53)	263
Unsaturated Light Hydrocarbons (D 1268 – 55)	269
Traces of Acetylene in High-Purity Ethylene (Proposed Method)	605
Chemical Methods for Butadiene	
Butadiene Content by Maleic Anhydride (D 973 – 59)	275
Alpha Acetylenes in Light Hydrocarbons (D 1020 – 61)	282
Oxygen in Light Hydrocarbons (D 1021 – 61 T)	286
Peroxide Content of Light Hydrocarbons (D 1022 – 59 T)	290
Ultimate composition	
Per Cent Hydrogen by Lamp Combustion (D 1018 – 55 T)	292
Per Cent Sulfur by Lamp (D 1266 – 62 T)	297
Per Cent Sulfur by Bomb (D 129 – 62)	314
Per Cent Sulfur by Quartz Tube (D 1551 – 58 T)	318
Per Cent Sulfur by High Temperature Combustion (D 1552 – 55T)	326
Thiophene in Benzene	
Thiophene in Benzene (D 1685 – 61 T)	332
Acid Treatment	
Total Aromatics and Olefins (D 1019 – 62)	336
Unulfonated Residue Plant Spray Oils (D 483 – 61 T)	347
Acid Wash Color (D 848 – 62)	354
Analysis of Rubber Extender and Process Oils by Sulfuric Acid (D 2006 – 62 T)	358
Bromine Tests	
Bromine Number (High Range) (D 1158 – 59 T and D 1159 – 61 )	366, 374
Bromine Index (Low Range) (D 1491 – 60 and D 1492 – 60)	385, 388
Spectroscopic Analysis	
General	
Definitions of Terms Relating to Absorption Spectroscopy (E 131 – 62 T)	393
Ultraviolet	
Ultraviolet Quantitative Analysis, General Techniques (E 169 – 60 T)	396
Butadiene by Ultraviolet (D 1096 – 54)	403
Benzene and Toluene by Ultraviolet (D 1017 – 51)	408
Absorbance and Absorbivity of Wax, White Oil, and Petrolatum (D 2008 – 62 T)	415
Naphthalene Hydrocarbons in Aviation Turbine Fuels (D 1840 – 61 T)	424
Infrared	
Infrared Quantitative Analysis, General Techniques (E 168 – 60 T)	428

Cracked C <sub>4</sub> by Infrared (Proposed Method)	441
Benzene, Toluene, Ethyl Benzene, and Individual xylenes (Proposed Method)	459
Ortho-Xylene, Meta-Xylene, Para-Xylene, and Ethylbenzene in Nitration Grade Xylene (Proposed Method)	465
Isooctane – Normal Heptane by Infrared (D1095 – 54) <sup>3</sup>	469
Mass Spectra	
Analysis of Natural Gas (D 1137 – 53)	473
Analysis of Carburetted Water Gas (D 1302 – 61 T)	484
Hydrocarbon Types in Low Olefin Gasolines (Proposed Method)	491
Hydrocarbon Types in Olefinic Gasoline (Proposed Method)	499
Carbon Number Distribution of Aromatic Compounds in Naphthas by Mass Spectrometry (D 1658 – 59 T)	513
Physical Separations and Analytical Calculations	
Physical Separation	
Engler Distillation, Total Immersion Thermometer (D 86 – 62)	519
Chemicals Distillation, Partial Immersion Thermometer (D 1078 – 58)	531
Distillation Apparatus (E 133 – 58)	537
Benzene and Toluene by Fractionation and Method D 875 Analysis (Emergency Method ES – 46) <sup>4</sup>	542
Depentanization of Gasoline and Naphtha (D 2001 – 62 T)	546
Separation of Residue from Butadiene (D 1023 – 52)	550
Butadiene Dimer and Styrene in Butadiene (D 1024 – 59)	553
Test for Nonvolatile Residue of Polymerization Grade Butadiene (D 1025 – 52)	559
Cut Analysis of Gasoline (Part of D 875 – 62 T)	561
Vacuum Distillation (D 1160 – 61)	565
Gas Chromatography	
Analysis of Cracked C <sub>4</sub> Fraction by Gas Chromatography (D 1717 – 61 T)	579
Analysis of Natural Gas by Gas Chromatography (D 1945 – 62 T)	584
Analysis of Propylene Concentrate by Gas Chromatography (Proposed Method)	599
Determination of Oxygen, Nitrogen, and Carbon Monoxide in C <sub>3</sub> and Lighter Products by Gas Chromatography (Proposed Method)	602
Ethylene in High-Purity Ethylene (Proposed Method)	608
Analysis of Isoprene by Gas Chromatography (Proposed Method)	612
Trace Amounts of Carbon Dioxide in Ethylene by Gas Chromatography (Proposed Method)	615
Liquid Chromatography	
Aromatics in Olefin-Free Gasoline (D 936 – 55)	619
Fluorescent Indicator Absorption Method for Olefins and Aromatics in Gasoline and Jet Fuels (D 1319 – 61 T)	628
Saturates Isolation Low Olefin naphtha (D 2002 – 62T)	635
Saturates Isolation – High Olefin Naphtha (D 2003 – 62T)	639
Analysis of Diesel Fuels (Proposed Method)	643
Analysis of Rubber Extender and Process Oils by Clay –Gel Adsorption (D 2007 – 62 T)	648
Physical Property Correlations and Analytical Calculation	
Olefins and Aromatics in Gasoline and Jet Fuel (D 875 – 62 T)	561
Naphthenes in Saturates Fractions by Refractivity Intercept (Proposed Method)	656
Carbon-type Composition of Insulating Oils of Petroleum Origin (D 2140 – 63 T)	659
Fractional Precipitation	
Polymer Content of Styrene Monomer (D 2121 – 62 T)	663
