Preface	iv
Introduction	v
List of Method:	
Numerical – IP Methods	ix
Numerical – ASTM – IP Joint Methods	xvii
Alphabetical	xix
Technical Equivalence between ASTM and IP Methods	xxiv
Obsolete Methods	xxv
IP Methods Reproduced in British Standards	xxvii
Summary of Changes in IP Methods for 1970 Edition of Part I	xxviii
SECTION 1	
Standard and Tentative Methods IP 1 to IP 164	1
SECTION 2	
Standard and Tentative Methods IP 165 to IP 271	719
Proposed Methods	1226
Specifications:	
Normal Heptane	1241
Iso-octane	1241
Petroleum Spirit – 40/60	1241
Petroleum Spirit – 60/80	1242
Petroleum Spirit – 100/120	1242
Benzene	1242
Benzole	1242
Toluene	1242
Toluole	1242
Acetone	1243
IP Standard Thermometers	1244
Appendix B Conversion of Kinematic Viscosity to Redwood No. I Viscosity	1275
Appendix C Boiling Points, Densities, and Heats of Combustion of Low-Boiling Hydrocarbons and Related Compounds	1277
Appendix D Evaluation of Crude Petroleum	1279
Appendix E Interpretation and Recommended Usage of IP Precision Data	1280
Appendix F Temperature Conversions	1285
Constitution of the Standardization Committee, Its Sub-committees, and Its Panels	1290
Index	1314
