

CONTENTS

	Page
Rapid Laboratory Methods Differential Infrared and Calibrated Membrane Filtration	1
Analysing the Ash Content in Used Oils by Emission Spectrography	7
Application of Thin Layer Chromatography to Analysis of Additives in Lubricants	13
The Photometric Analysis of Blotter Spot Tests	17
The French Navy STM Control Kit	31
Rapid Analysis Methods for used Oils in Service Equipment	39
In-Service Testing and Lubrication Monitoring	45
The Viewpoint of a Large Motor-Pool Operator	69
A Brief Look at the Activities of the CL9 Project Group of the CEC Engine Monitoring Group	71
Engine Monitoring by Spectrometry	75
Photographs of Rapid Analysis Equipment	83
