

CONTENTS

	Page
Introduction	vii
Chapter 1. Basic elements of the chemistry of hydrocarbons and their derivatives	1
1. Summary of facts about hydrocarbons and their structure	1
2. General outline of carbon compounds	4
3. Homologous series of the different classes of hydrocarbons	11
4. Isomerism	12
5. Derivatives of hydrocarbons	18
Chapter 2. Petroleum, their composition and properties	20
1. The elementary composition of petroleum	20
2. The chemical composition of petroleums and their separate fractions	21
3. The individual hydrocarbon composition of light petroleum fractions	28
Chapter 3. Natural and synthetic petroleum gases as raw materials for the manufacture of] synthetic materials	32
Chapter 4. Modern industrial synthetic materials produced from crude petroleum	40
1. Basic methods for the chemical processing of petroleum in order to obtain hydrocarbon raw materials for the production of synthetic materials	40
2. Modern synthetic materials obtained from petroleum	51
Appendices	101
Literature	128
