

CONTENTS

	Page
Section A	
Analytical Procedures	
A – 4	Refractive Index 5
A – 5	Analysis of Clay 7
A – 22	Analysis of Charging Stocks for Salt Content 13
A – 30	Sulfur in High Sulfur Oils (Peroxide Bomb) 16
A – 40	Volumetric Method for Sulfur in Coal, coke and Heavy Petroleum Distillates 18
A – 102	Sulfur in Petroleum Products by Means of Combustion 20
A – 119	Sulfur and Sulfur Derivatives of Hydrocarbons in Petroleum Distillates 22
A – 32	Carbon and hydrogen Analysis of Organic Compounds by the Combustion Method 25
A – 46	Paraffin Content of Petroleum 28
A – 70	Free Sulfuric Acid in Light Oil Sludge 29
A – 73	Tetraethyl Lead in Gasoline 31
A – 74	Boiler Water Analysis 33
A – 82	A Laboratory Metal Corrosion Test 36
A – 103	Molecular Weight of Petroleum – Cryoscopic Method 39
A – 106	Estimation of Molecular Weights fo Petroleum Fractions 43
A – 107	Suspended Level Capillary Viscosimeter for Liquid Hydrocarbons 47
A – 108	Viscosity of Liquid Hydrocarbons – Oswald Capillary Viscosimeter 50
A – 120	Nitrogen in Petroleum 52
A – 133	Analysis of Refinery Caustic Solutions Used for Hydrogen Sulfide Removal 54
A – 141	Litharge in Doctor Solution 56
A – 145	Litharge in Doctor Solution 59
Section B	
Asphalt and Road Oil	
B – 83	A Laboratory Preparation of Asphalts 63
B – 16	Softening point of Bituminous Materials (Kramer-Sarnow) 65
B – 112	A Modification of the A.S.T.M. Standard Method of Test for Softening Point of Bituminous Materials – Ring and Ball Method 67
B – 25	Cube-In-Air Softening Point of Bituminous Materials 68
B – 27	Free Carbon in Bituminous Materials 70
B – 39	Homogeneity of Asphalt and Similar Materials (Oliensis) 72
B – 61	Solubility of Asphalt in Petroleum Naphtha 74
B – 71	Saybolt Viscosity of Road Oils and Similar Asphaltic Materials 77
B – 118	Susceptibility of Asphalt to Temperature Changes 79
B – 140	Analysis of Bitumen 80
Section C	
Coal, Shale and Lignite	
C – 78	Tar Acids and Tar Bases in Coal Tars, Shale Oils, Their Distillates and Similar Products 82
Section D	
Coke	
D – 2	Reactivity of Coke 85
Section E	
Crude Oil	
E – 23	Tar Number of Heavy Oils 89
E – 99	pentane Insolubility of Petroleum Oils 90

E – 77	Gasoline, Naphtha and Kerosene contents of Crude Oil by Hempel Distillation	92
E – 79	An apparatus for the Precise Fractionation of Petroleum Oils	97
E – 101	True Boiling Point Distillation – Peters' Column	98
E – 96	Equilibrium Flash Vaporization Curve of Petroleum Oils	99
E – 76	Routine High Vacuum Distillation of Heavy Oils	103
E – 109	Vacuum Distillation of Topped Crudes and Similar Petroleum Products	107

Section F

Fuel Oil

F – 1	Distillation of Heavy Petroleum Oils	110
F – 56	Sediment in Fuel Oil by Extraction	115
F – 90	Stability of Fuel Oil (Wilmington Test)	117
F – 81	Engler viscosity of Petroleum Oils	118
F – 92	Viscosity of Fuel Oil – Redwood Admiralty Viscosimeter	120
F – 124	Carbon Residue of Domestic Fuel Oils	122
F – 127	Modification of the Standard Method of Test for Carbon Residue of petroleum Products A.S.T.M. Designation D 189 – 30	123
F – 134	Ash Content of fuel Oil	124

Section G

Gas

G – 98	Sampling Gas at the Refinery for Analysis	125
G – 113	Specific Gravity of Gas – Dumas Method	128
G – 114	Specific Gravity of Gas – Shilling Effusion Method	130
G – 9	Hydrogen Sulfide in Gases (Tutwiler)	132
G – 17	Butadiene in Petroleum Gases	135
G – 123	Higher Olefins in Refinery Gases (Sodium Iodate)	139
G – 137	Gaseous olefin Hydrocarbons by catalytic Hydrogenation	141
G – 49	Gasoline Content of Gases – Low Temperature Podbielniak distillation	144
G – 50	Gasoline Content of Gases (Condensation Method)	147
G – 62	Analysis of Gaseous Hydrocarbons – Stock Gas-Density Balance	153
G – 59	Analysis of Complex Gaseous Hydrocarbons by Fractionation and Absorption	157
G – 84	Analysis of Gas – Göckel apparatus	162
G – 116	Colorific Value of Gas – Continuous Flow Calorimeter	172

Section H

Gasoline

H – 97	Acid Treating and Rerunning Petroleum Distillates	178
H – 75	Vapor Phase Clay Treatment of Gasoline	183
H – 3	Chemical Analysis of Motor Fuels (Kattwinkel)	185
H – 44	Unsaturated hydrocarbons in Petroleum Distillates – Bromine Number	186
H – 33	Peroxides in Gasoline	188
H – 6	Induction Period of Gasoline by Oxygen Bomb	195
H – 8	Acid Number of Gasoline	198
H – 24	Acidity in Gasoline	199
H – 139	Alkalinity of Gasoline	200
H – 58	Aldehydes in Gasoline	201
H – 34	Acid Heat of Gasoline	203
H – 19	Elementary Sulfur in Gasoline	205
H – 42	Mercaptan Sulfur in Gasoline and Other Petroleum distillates	208
H – 41	Doctor Test for Gasoline, Naphtha, Kerosene and Similar Distillates	210
H – 88	Chlorine in Gasoline	211
H – 11	Copper Dish Gum Content of Gasoline	213
H – 95	Potential Gum content of Gasoline – Ethyl Method	215
H – 93	Accelerated Test for Color Stability of Gasoline	219
H – 36	Corrosion Test of Benzol	220

Section I

Inhibitor

I – 65	Relative Effectiveness of Gasoline Inhibitors	221
--------	---	-----

Section J
Kerosene and Diesel Fuel

J – 10	Aniline Point of Petroleum Fractions	223
J – 14	Flock Test for Kerosene and Mineral Seal Oil	225
J – 89	Spontaneous Ignition Temperature of Liquid Fuel (Moore Bomb)	227
J – 94	Open Cup Flash and Fire Temperatures of Illuminating Oil	230

Section K
Lubricating Oils

K – 20	Indiana Oxidation Test for Lubricating Oils	233
K – 51	Calculation of Viscosity-Gravity Constant of Petroleum Oils	235
K – 69	Viscosity Index	237
K – 72	Viscosity Index Chart	240

Section L
Solvents

L – 31	Kauri – Butanol Value of Solvents	242
--------	-----------------------------------	-----
