

CONTENTS

	Page
CHAPTER XI	
Analysis and Examination of Motor Fuels	513-603
CHAPTER XII	
Sulphur in Motor Fuels from the Automotive Standpoint	604-613
CHAPTER XIII	
The Formation, Estimation and Significance of Gum Motor Fuels	614-656
CHAPTER XIV	
Internal Combustion Engines	657-694
CHAPTER XV	
The Effect of Fuel Volatility Characteristics on Engine Performance	695-735
CHAPTER XVI	
Knock Ratings	736-800
CHAPTER XVII	
Motor Fuel Specifications and Properties of motor Fuels marketed in Different Countries	801-823
CHAPTER XVIII	
Aviation Fuels	824-849
CHAPTER XIX	
Automotive Diesel Engines and Diesel Oils	850-889
APPENDIX	
Gravities, Pounds, Gallons and Tons	890
Specific Gravities and Baume Gravities for Liquids Heavier Than Water	891
Thermal Expansions of Gasoline Benzole Mixtures	892
Corrections to Readings of Hydrometers in Gasoline Benzole Mixtures to Reduce to °A.P.I. At 60 °F	893
Corrections to Readings of Hydrometers in Gasoline Benzole Mixtures to Reduce to Specific Gravity at 60 °/60 °F	894
Sodium Hydroxide Solutions	895
Sulphuric Acid Solutions	896
Specific Gravity of Fuming Sulphuric Acid	897
Correction of Specific Gravity of Sulphuric Acid to 15 °C	898
Molecular Weights	899
Vapour Pressures of Hydrocarbons	900
Vapour Pressures of English Motor Fuels	901
Vapour Pressures of Ethyl Alcohol-Benzene Mixtures	902
Critical Temperatures and Critical Pressures of Hydrocarbons	903
Kinematic Viscosities of English Market Fuels	904
Absolute Viscosities of Hydrocarbons	905
Viscosity of Water	906
Latent Heats of Vaporization	907
Specific Heats	908
Solubility of Water in Hydrocarbons	909
Freezing Point of Benzene-Ethyl Alcohol Mixtures	910

Freezing Points of Aqueous Ethyl Alcohol Solutions	911
Properties of Dry Air	912
Formulae for Horse Power, Torque and Mean Effective Pressure	913
Statistics of the Petroleum Industry	914
