

CONTENTS

	Page
The petroleum industry	
The world petroleum industry	2
The Royal Dutch/Shell Group of Companies	14
Production	
Exploration	20
Drilling	33
Oilfield development and production	49
The chemistry of petroleum	
The chemistry of petroleum	60
Natural gas	
Natural gas	68
Oil products-manufacture	
Manufacturing Processes	78
Distillation	81
Crystallization	87
Solvent extraction	89
Adsorption and absorption	92
Cracking	94
Reforming	100
Polymerization, alkylation, isomerization and cyclization	102
Asphalt blowing	106
Treating processes	107
Subsidiary processes	111
Oil products – applications	
Introduction	114
Fuels and lubricants for automotive IC engines	121
Fuels and lubricants for aviation IC engines	132
Fuels and lubricants for marine, industrial and locomotive IC engines	139
Fuels for domestic, industrial and agricultural use	144
Lubricants for industry	155
Petroleum waxes	166
Bitumen	170
Test methods and their significance	180
Chemicals – manufacture and applications	
The petroleum-chemical in industry	194
Raw materials and primary conversion processes	196
Solvents	201
Detergents	208
Synthetic resins – plastics	212
Synthetic textile fibres	222
Synthetic rubbers	224
Industrial chemicals	227
Agricultural chemicals	236

Marketing	
Marketing	246
Transport, distribution and storage	
Tankers	252
Trunk pipelines	262
Distribution of oil products and chemicals	268
Installations and depots	275
Measurement and loss control	282
Research and development	
Research and development	292
Bibliography	301
Index	305
