

## CONTENTS

	Page
THE PROBLEM	1
CONCLUSIONS	3
I    Effects of Autohydrogenation on High-Btu Oil Gas Substitutability for Natural Gas	4
II   Selection of Autohydrogenation Catalysts	6
III  Effects of Temperature and Space Velocity on Activity of Nickel Catalysts	9
IV  Effects of Feed Composition on Activity of Nickel Catalysts	10
V   Autohydrogenation Reactor Design	15
VI  Sulfur Removal	17
DISCUSSION	
I    Thermodynamics of Olefin Hydrogenation	19
II   Catalysis of Olefin Hydrogenation Reactions	20
III  Kinetics of Olefin Hydrogenation	23
IV  Conversion of Ethylene to Methane	27
V   Sulfur Removal	31
VI  Catalyst Preparation, Testing, and Regeneration	41
EQUIPMENT AND PROCEDURES	
I    Autohydrogenation Test Units	44
II   Feed Gas Production and Purification	47
III  Method of Calculating Equilibrium Product Composition	52
IV  Methods of Calculation and Data Presentation	54
REFERENCES CITED	55
TABULAR SUMMARY OF EXPERIMENTAL DATA	56 -75
