
CONTENTS

<i>Foreword</i>	iii
<i>Preface</i>	v
<i>Acknowledgements</i>	vi
1. INTRODUCTION	1
1.1 Bio-Energy	1
1.2 Overview of Biogas Technology	1
1.2.1 Biogas/Biomethanation System	1
1.2.2 Benefits of Biogas Systems	2
1.2.3 Drawbacks of Biogas Systems	4
1.2.4 Appropriateness of Biogas Technology	6
1.3 Technical Status of Biogas Technology	6
1.3.1 Digester Designs	6
1.3.2 Operational Parameters	10
1.4 Economic Viability of Biogas Technology	13
1.5 The Diffusion Status of Biogas Technology in Developing Countries	16
1.6 Biogas Technology Scenario in India	18
1.6.1 The Centrally Approved Designs of Plants	19
1.6.2 Suggested Retention Periods	19
1.6.3 Cost of Installation	19
2. MATERIALS FOR BIOMETHANATION AND PRODUCTS OF METHANATION	21
2.1 Biomass and its Availability	21
2.2 Biodegradability	23
2.3 Raw Materials for Biogas Production and Their Characteristics	25
2.3.1 Land Based Materials	26
2.3.2 Animal Based Materials	28
2.3.3 Water Based Materials	30
2.4 Conversion Principles	31
2.4.1 Mixing and Feeding Raw Materials into the Digester	31
2.4.2 Digestion	32
2.4.3 Biogas Properties	36
2.5 Fermented Slurry as Fertiliser	40

**3. KINETICS AND PHYSICO-CHEMICAL FACTORS
AFFECTING BIOGASIFICATION**

43

- 3.1 Mathematical Analysis 43
- 3.2 Physico-Chemical Factors 46
 - 3.2.1 Temperature 46
 - 3.2.2 Retention Period 48
 - 3.2.3 Effect of Mixing and Scum Control 50
 - 3.2.4 Effect of Gas Pressure, Air Tightness and Storage 50
 - 3.2.5 Effect of Carbon to Nitrogen (C/N) Ratio 51
 - 3.2.6 Effect of Water Content on Methane Production Rate 54
 - 3.2.7 pH 55
 - 3.2.8 Effect of Different Compounds on Methane Yield 56
 - 3.2.9 Toxic Substances 56
- 3.3 Mode of Slurry Flow 56
 - 3.3.1 Batch and Dry Fermentation 57
 - 3.3.2 Semi-Continuous Fermentation (See Fig. 3.9) 59
 - 3.3.3 Continuous Fermentation (See Fig. 3.10) 59
 - 3.3.4 Plug-Flow Design 60
 - 3.3.5 Hybrid Design (Diphasic concept) 60

4. BIO-REACTORS

61

- 4.1 Types of Bio-Reactors 61
- 4.2 Low Yielding Reactors 63
 - 4.2.1 Constant Pressure (Floating cover/drum) (Indian) Type Reactors 63
 - 4.2.2 Ganesh Model (Fig. 4.4) 67
 - 4.2.3 Pragathi Model (Fig. 4.5) 67
 - 4.2.4 Astra Model (Fig. 4.6) 69
 - 4.2.5 Jwala Biogas Plant (Fig. 4.7) 69
 - 4.2.6 Botswana Model (Fig. 4.8) 70
 - 4.2.7 Some Latin American Plant Models (Fig. 4.9) 71
- 4.3 Constant Volume Fixed Dome (Chinese) Type Digesters 71
 - 4.3.1 A Liquid Morter Plant 75
 - 4.3.2 Spherical Biogas Plant (Fig. 4.12) 75
 - 4.3.3 The Janatha Plant (Fig. 4.13) 76
 - 4.3.4 Deenbandhu (Fig. 4.14) 77
 - 4.3.5 Batch Digester 78
 - 4.3.6 Manawat Digester 78
 - 4.3.7 Chinese Test Reactor (Red-mud Plastic Gasholder Digester) 79
 - 4.3.8 Germen Designs 79
- 4.4 Comparison of Floating Gasholder and Fixed-Dome Types of Biogas Units 80
- 4.5 Plastic Bag Digesters 81
 - 4.5.1 RMP Model 81
 - 4.5.2 Bag/Tube/Flexi/Balloon/Digesters 82
- 4.6 Pre-Fabricated Steel/Plastic Digesters 83
 - 4.6.1 Khira Pre-Fabricated Steel Reactor 84

- 4.7 Horizontal masonry digesters/Large size Low Yield Reactors 85
 - 4.7.1 Horizontal Digester (Fig. 4.23) 85
 - 4.7.2 IIE Model (Fig. 4.24) 85
 - 4.7.3 Tunnel Type Digester (Fig. 4.25) 86
 - 4.7.4 Maya Farms Model (Fig. 4.26) 87
 - 4.7.5 Large Farm Biogas Plants 87
 - 4.7.6 Others 88
- 4.8 High Yielding Reactors 89
 - 4.8.1 Digestion Technologies in Developed Countries 89
 - 4.8.2 Strategies for Optimisation of Biogas Yield using Phase Separation Concepts 92
 - 4.8.3 Fixed Film and Suspended Growth Reactors 93
- 4.9 Upflow Anaerobic Sludge Blanket Reactors 95
- 4.10 Anaerobic Contact Reactors 96
- 4.11 Anaerobic Filter Reactors 97
- 4.12 Flexible Top Plug Flow Digester 100
- 4.13 Bio-Funnel Reactor (Fig. 4.38) 101
- 4.14 Anaerobic Baffle Reactor 102
- 4.15 Shape and Static Loading 103
- 4.16 Some Guidelines for Planning, Selecting, Designing, Constructing, and Operating Biogas Systems 107
- 4.17 Biogas Plants in Cold Regions 113

5. DESIGN, SELECTION, CONSTRUCTION AND OPERATION OF BIOGAS PLANTS

114

- 5.1 Design of the Digester (Based on methane production rate) 114
 - 5.1.1 Size Based on Health Criteria 114
 - 5.1.2 Size Based on Production of Soil Conditioner 114
 - 5.1.3 Size Based on Energy 114
- 5.2 Design Based on End Use Requirements 120
 - 5.2.1 Approach A 121
 - 5.2.2 Approach B (Allows for C/N ratio) 125
- 5.3 Scaling of Biogas Plants (GTZ method) 126
 - 5.3.1 Scaling of the Digester 127
 - 5.3.2 Scaling of Gasholder 128
 - 5.3.3 Digester/Gasholder Ratio 132
- 5.4 Digester Sizing (For a given end use device efficiency) 136
- 5.5 Optimal Design [KVIC] 137
 - 5.6.1 Optimum Design for Minimising Gas Holder Cost 140
 - 5.6.2 Optimum Design for Minimising Capital Cost of the Plant 141
- 5.7 Design of Fixed Dome Type of Digesters 142
 - 5.7.1 Slurry Movement in a Fixed Dome Digester 143
 - 5.7.2 Design Calculations 144
- 5.8 Material Estimate for Fixed Dome Plants 150
 - 5.8.1 Concreting 150
 - 5.8.2 Brickwork 151
 - 5.8.3 Plastering and Filling 153

5.9	Selection of Type and Size of Biogas Reactors and Their Specifications	156
5.9.1	KVIC Design Specifications for Different Types of Biogas Plants	157
5.10	Material Estimates for Different Types of Plants	168
5.11	Gate (German Appropriate Technology Exchange)/CTZ/Borda Designs	172
5.12	Design Specifications for Deenbandhu Biogas Plants	178
5.13	Other Demonstrative Designs	181
5.13.1	Type 1: Biogas System for Household Wastes	181
5.13.2	Type 2: Biogas System for Both Household Wastes and Public Latrine Wastes	183
5.14	The Other Parts of Biogas Plants and Their Functions	186
5.14.1	Mixing Tank and Inlet and Outlet of Slurry (see also section 4.16)	186
5.14.2	Floating Gas Drum (see also section 4.16)	191
5.14.3	Water-Jacket Plant	194
5.14.4	Fixed-Dome Plants	195
5.14.5	Large-Scale Plants	197
5.15	Constructional Aspects	198
5.15.1	Materials	198
5.15.2	Alternative Construction Materials	198
5.15.3	Masonry and Mortar	199
5.15.4	Mixing Ratio	199
5.15.5	Construction Techniques	199
5.15.6	Spherical Shell of Masonry Construction	200
5.15.7	Constructional Problems	202
5.16	Operational Problems in Biogas Plants	202
5.16.1	Regular Operation of the Plant	203
5.16.2	Problems of Underfeeding	203
5.16.3	Common Operational Problems	204
5.17	Methods of Improving Plant Productivity	204
5.17.1	Thermal Methods (see also section 4.16)	204
5.17.2	Mechanical Methods (see also section 4.16)	207
5.17.3	Chemical and Microbiological Methods (see also section 3.2.8)	207
5.18	Measuring and Test Programs	207
6.	PURIFICATION, SCRUBBING, COMPRESSION AND STORAGE OF BIOGAS	211
6.1	Properties of H ₂ S	211
6.2	Origin of H ₂ S in Biogas Plants	211
6.3	Effect of H ₂ S on Biogas Plant and Devices	212
6.4	Determination of H ₂ S Content in Biogas	212
6.5	Methods for Removing H ₂ S From Biogas	213
6.5.1	The Lime Process	213
6.5.2	By Ferrous Materials	213
6.5.3	Chemistry	213
6.5.4	Regeneration	213
6.6	Process Techniques	213
6.6.1	Without Regeneration	214

- 6.6.2 With Regeneration 214
- 6.6.3 Simultaneous Regeneration and Loading 214
- 6.6.4 Purifying Absorbents 214
- 6.7 Requirements of Absorbent 214
- 6.8 The Desulphurising Apparatus 215
- 6.9 Operation Procedures for Gas Desulphurisation 217
- 6.10 Summary 219
- 6.11 Scrubbing, Storage, Transportation 219
 - 6.11.1 Scrubbing 219
 - 6.11.2 Reagents 220
 - 6.11.3 Scrubbing Process 220
 - 6.11.4 Biogas Scrubbers 221
 - 6.11.5 Cost 221
 - 6.11.6 Storage 221
 - 6.11.7 Transportation 222
- 6.12 A Case Study of Manufacture of Compressed Biogas 222
 - 6.12.1 Introduction 222
 - 6.12.2 Production of Raw Biogas 223
 - 6.12.3 Compression 223
 - 6.12.4 Drying 224
 - 6.12.5 High Pressure Gas Storage Equipment 225
 - 6.12.6 Dispensing and Metering 225
- 6.13 Gas Distribution Pipe Line (For Conventional Biogas Plants) 226
 - 6.13.1 Gas Pipe-Size Selection and Installation 226
 - 6.13.2 Flame Arrester 228
 - 6.13.3 Manometer and Safety Valve 228
 - 6.13.4 Safety 230

7. UTILISATION SYSTEMS OF BIOGAS

231

- 7.1 Biogas as an Alternative Energy Source 231
- 7.2 Biogas Utilisation 233
- 7.3 Biogas Burners 235
- 7.4 Design of Biogas Burners 237
- 7.5 Some Stove Models 238
 - 7.5.1 Watson House Burner (Fig. 7.3) 238
 - 7.5.2 Tin Burners (Fig. 7.4) 239
 - 7.5.3 Some Biogas Stoves in Market 239
 - 7.5.4 Burner Adjustments 243
 - 7.5.5 Biogas Fired Water Heater 244
- 7.6 Lighting Mantles 245
 - 7.6.1 Operation and Maintenance 246
- 7.7 Biogas Use in Stationary power Plants 247
 - 7.7.1 Modified Petrol Engines 249
 - 7.7.2 Modified Diesel Engines (The Dual Fuel Engine) 251

7.7.3	A Case Study	255	
7.7.4	Use of Biogas in Gas Turbines	258	
7.7.5	Use of Biogas in Refrigerators	258	
7.8	Mobile Power Plants	259	
7.9	Pollution Control Through Anaerobic Digestion	260	
7.9.1	Water Pollution Control	260	
7.9.2	Smell and Odour Control	262	
7.9.3	Pathogen Removal	263	
8.	ETHANOL		264
8.1	Ethanol Production Methods	264	
8.1.1	Basic Biology	264	
8.1.2	Plant-Materials Suitable for Ethanol Production	265	
8.1.3	Fermentation Parameters	266	
8.2	Energy Analysis	266	
8.3	Comparative Characteristics of Alternative Fuels for Transport	267	
8.3.1	Potential of Ethanol as Substitute Fuel	267	
8.3.2	Pure Ethanol as a Fuel	268	
8.4	Brazilian Alcohol Program: An Overview	268
